BASIC ASPHALT RECYCLING MANUAL

Table of Contents

PART 1: INTRODUCTION, RECYCLING AND RECLAIMING METHODS

CHAPTER 1: INTRODUCTION 1

1.1 Background 2
1.2 Asphalt Recycling and Reclaiming Methods 4
1.3 Hot Recycling (HR) 5
1.4 Cold Planing (CP) 6
1.5 Hot In-place Recycling (HIR) 9
1.5.1 Surface Recycling 10
1.5.2 Remixing 12
1.5.3 Repaving 12
1.5.4 HIR Advantages 14
1.6 Cold Recycling (CR) 15
1.6.1 Cold In-place Recycling (CIR) 15
1.6.1.1 Single Unit CIR Train 15
1.6.1.2 Two-Unit CIR Train 15
1.6.1.3 Multi-Unit CIR Train 17
1.6.2 Cold Central Plant Recycling (CCPR) 18
1.6.3 CR Compaction 20
1.6.4 CR Curing 20
1.6.5 CR Secondary Compaction 21
1.6.6 CR Surface Course 21
1.6.7 CR Advantages 21
1.7 Full Depth Reclamation (FDR) 21
1.7.1 FDR Equipment 22
1.7.2 Shaping and Compacting 23
1.7.3 FDR Advantages 24

CHAPTER 2: ASPHALT RECYCLING AND RECLAIMING STRATEGIES IN PAVEMENT MANAGEMENT 25

CHAPTER 3: PROJECT EVALUATION 33

3.1 Visual Pavement Assessment 33
3.1.1 Surface Defects 35
3.1.2 Deformations 38
3.1.3 Cracking 40

3.1.3.1 Load Associated Cracking 40
3.1.3.2 Non-load Associated Cracking 41
3.1.3.3 Combined Load and Non-load Associated Cracking 44
3.1.4 Existing Maintenance Activities 44
3.1.5 Base/Subgrade Deficiencies 44
3.1.6 Ride Quality 46
3.1.7 Safety Evaluation 46
3.2 Historic Information Review 46
3.3 Pavement Properties Assessment 46
3.3.1 Roughness 47
3.3.2 Rutting 47
3.3.3 Friction Number 48
3.3.4 Structural Capacity 48
3.3.5 Material Properties 50
3.4 Project Level Distress Evaluation 51
3.5 Preliminary Maintenance or Rehabilitation Selection 53
3.6 Economic Analysis 56
3.7 Project Design For Anticipated Traffic Loading 57

PART 2: COLD PLANING (CP)

CHAPTER 4: COLD PLANING CONSTRUCTION 59

4.1 CP Project Planning and Preparation 60
4.2 CP Equipment 61
4.3 CP Operations 66
4.4 Micro and Fine Milling 70
4.5 Rumble Strips and Recessed Markers 72

CHAPTER 5: COLD PLANING SPECIFICATIONS 73

5.1 General Description 73
5.2 Material Requirements 74
5.3 Equipment Requirements 74
5.4 Construction Requirements 75
5.5 Quality Control and Acceptance Requirements 75
5.6 Measurement and Payment 77

PART 3: HOT IN-PLACE RECYCLING (HIR)

CHAPTER 6: HOT IN-PLACE RECYCLING DETAILED PROJECT ANALYSIS 79

6.1 Historic Information Assessment 80
6.2 Pavement Assessment 81
6.3 Structural Capacity Assessment 84
6.4 Material Properties Assessment 84
6.5 Geometric Assessment 85

6.6 Traffic Assessment 86
6.7 Constructability Assessment 86
6.8 Environmental Implications 87
6.9 Economic Assessment 88

CHAPTER 7: HOT IN-PLACE RECYCLING MIX DESIGN 89

7.1 Asphalt Binder Rejuvenation 90
7.2 HIR Mix Design Process 91
7.2.1 Sampling 92
7.2.2 Existing Pavement Properties 92
7.2.3 Selection of Rejuvenating Agent 93
7.2.4 Simplified HIR Mix Design 93
7.2.5 Comprehensive Mix Design 94
7.2.5.1 Existing Pavement Binder and Aggregate Properties 94
7.2.5.2 Admixture and New Aggregates 95
7.2.5.3 Mixing and Compacting Laboratory Specimens 95
7.2.5.4 Performance Tests 96
7.2.6 Mix Design and Job Mix Formula (JMF) 96
7.2.7 Field Adjustments 96

CHAPTER 8: HOT IN-PLACE RECYCLING CONSTRUCTION 97

8.1 Common HIR Equipment 97
8.1.1 Preheater Units 98
8.1.2 Heater Scarification/Augering/Milling Units 100
8.1.3 Single Stage and Multi-Stage HIR 103
8.1.4 Compaction Equipment 105
8.2 HIR Surface Recycling 105
8.3 HIR Remixing 110
8.4 HIR Repaving 113

CHAPTER 9: HOT IN-PLACE RECYCLING SPECIFICATIONS AND INSPECTION 117

9.1 Quality Assurance 118
9.2 Project Specification and Inspection Guidelines 119
9.2.1 General Description 120
9.2.2 Preconstruction Personnel Training 120
9.2.3 Treatment Depth 120
9.2.4 Material Requirements 121
9.2.5 Mix Design 122
9.2.6 Equipment Requirements 122
9.2.7 Construction Methods 123
9.2.7.1 Roadway Preparation 123
9.2.7.2 Weather 123
9.2.7.3 Control Strip 123
9.2.7.4 Pavement and Mixture Heating 124

9.2.7.5 In-place Mixture Properties 126
9.2.7.6 Compaction 127
9.2.8 Surface Tolerance 127
9.2.9 Smoothness 127
9.2.10 Maintenance 128
9.2.11 Quality Control and Owner Agency Acceptance Testing 128
9.2.12 Measurement and Payment 128
9.3 Special Provisions 129

PART 4: COLD RECYCLING (CR)

CHAPTER 10: COLD RECYCLING DETAILED PROJECT ANALYSIS 131

10.1 Historic Information Assessment 133
10.2 Pavement Assessment 134
10.3 Structural Capacity Assessment 136
10.4 Material Properties Assessment 138
10.5 Geometric Assessment 138
10.6 Traffic Assessment 141
10.7 Constructability Assessment 143
10.8 Environmental Implications 143
10.9 Economic Assessment 144

CHAPTER 11: COLD RECYCLING MIX DESIGN 145

11.1 Sampling 146
11.1.1 Sampling Existing Pavement for CIR and CCPR 146
11.1.2 Stockpile Sampling for CCPR 147
11.2 Determination of Binder Content and Gradation of Extracted Aggregate 148
11.3 Determination of Aged Binder Properties 148
11.4 Crush Materials to Produce and Determine Gradation 148
11.5 Selection of Recycling Agent 149
11.5.1 Emulsified Asphalt 149
11.5.1.1 Engineered Emulsions 150
11.5.1.2 Cationic Slow and Medium Set Emulsions 150
11.5.1.3 High Float Medium Set Emulsions 150
11.5.2 Foamed Asphalt 150
11.5.3 Other Recycling Agents 151
11.5.3.1 Emulsified Rejuvenating Agents 152
11.5.3.2 Cutback Asphalts 152
11.6 Selection of Recycling Additives 152
11.6.1 Chemical Additives 152
11.6.2 Corrective Aggregate 153
11.7 Prepare and Test Specimens 153
11.7.1 Batching 153
11.7.2 Moisture Content for Adequate Coating 154
11.7.3 Mixing 154

11.7.4 Laboratory Compaction 155
11.7.5 Laboratory Curing 155
11.7.6 Strength and Moisture Sensitivity Testing 155
11.7.7 Raveling Test 156
11.7.8 Thermal Cracking 157
11.8 Establish Job Mix Formula 158
11.9 Field Adjustments 158

CHAPTER 12: COLD RECYCLING CONSTRUCTION 159

12.1 Preparation of Construction Areas 162
12.2 Removal of RAP 163
12.3 CIR Train Configurations 165
12.3.1 Single Unit Train 165
12.3.2 Two-Unit Trains 166
12.3.3 Multi-Unit Trains 168
12.4 Cold Central Plant Recycling (CCPR) Equipment 170
12.5 Addition of Recycling Agent 173
12.5.1 Emulsified Asphalt 174
12.5.2 Asphalt Binder for Foamed Asphalt 174
12.6 Addition of Recycling Additives 174
12.6.1 Additive Addition in CIR 175
12.6.2 Additive Addition in CCPR 176
12.7 Field Adjustments to CR Mixtures 176
12.8 Laydown and Compaction 177
12.9 Curing 180
12.10 Secondary Compaction 181
12.11 Surface Course 182

CHAPTER 13: COLD RECYCLING SPECIFICATIONS AND INSPECTION 183

13.1 Quality Assurance 184
13.2 Project Specification and Inspection Guidelines 185
13.2.1 General Description 186
13.2.2 Preconstruction Personnel Training 186
13.2.3 Treatment Depth 186
13.2.4 Material Requirements 187
13.2.4.1 Reclaimed Asphalt Pavement 187
13.2.4.2 Bituminous Recycling Agent 188
13.2.4.3 Recycling Additives 189
13.2.4.4 Water 190
13.2.5 Mix Design 190
13.2.6 Equipment Requirements 191
13.2.6.1 Pavement Cold Planer (Milling Machine) 191
13.2.6.2 Crushing and Sizing Equipment 191
13.2.6.3 Mixing and Proportioning Equipment 191
13.2.6.4 Dry Recycling Additive Equipment 192

13.2.6.5 Cement or Lime Slurry Storage and Supply Equipment 193
13.2.6.6 Paving Equipment 193
13.2.6.7 Compaction Equipment 193
13.2.6.8 Water Truck 193
13.2.6.9 Fog Sealing and Sand Spreading Equipment 194
13.2.7 Construction Methods 194
13.2.7.1 Roadway Preparation 194
13.2.7.2 Weather 194
13.2.7.3 Control Strip 195
13.2.7.4 Recycling Additive Application 196
13.2.7.5 Moisture Addition 197
13.2.7.6 Processing and Placement of Recycled Mixture 198
13.2.7.7 Hauling of CCPR Material 198
13.2.7.8 Compaction 199
13.2.7.9 Fog Sealing and Sanding Protection 201
13.2.7.10 Secondary Compaction 201
13.2.7.11 Curing 201
13.2.8 Surface Tolerance and Smoothness 202
13.2.9 Maintenance 202
13.2.10 Quality Control and Owner Agency Acceptance Testing 203
13.2.11 Surfacing 204
13.2.12 Measurement and Payment 204
13.3 Special Provisions 205

PART 5: FULL DEPTH RECLAMATION (FDR)

CHAPTER 14: FULL DEPTH RECLAMATION DETAILED PROJECT ANALYSIS 207

14.1 Historic Information Assessment 209
14.2 Pavement Assessment 209
14.3 Structural Capacity Assessment 210
14.4 Material Properties Assessment 211
14.5 Geometric Assessment 212
14.6 Traffic Assessment 213
14.7 Constructability Assessment 214
14.8 Environmental Implications 214
14.9 Economic Assessment 215

CHAPTER 15: FULL DEPTH RECLAMATION MIX DESIGN 217

15.1 Preliminary Selection of Stabilizing Agent 218
15.1.1 Chemical Stabilizing Agents 220
15.1.2 Bituminous Stabilizing Agents 220
15.1.2.1 Emulsified Asphalt 221
15.1.2.2 Foamed (Expanded) Asphalt 221
15.2 Mix Design Guidelines 222

15.2.1 Sampling Existing Pavement .223
15.2.2 Existing Material Properties .224
15.2.3 Pulverization Mix Design .224
15.2.4 Mechanical Mix Design .225
15.2.5 Chemical Stabilization Mix Design .225
15.2.5.1 Cementitious Stabilizing Agents .226
15.2.5.2 Lime/LKD Stabilizing Agents .228
15.2.6 Bituminous Stabilization Mix Design .228
15.2.6.1 Selection of Bituminous Stabilizing Agent .229
15.2.6.2 Determining Optimum Foaming Characteristics .229
15.2.6.3 Determining Compatibility of Emulsified Asphalt .231
15.2.6.4 Mixing, Compaction and Curing .231
15.2.6.5 Strength and Moisture Sensitivity .232
15.3 Field Adjustments .233

CHAPTER 16: FULL DEPTH RECLAMATION CONSTRUCTION .235

16.1 Preparation and Planning .237
16.1.1 Preliminary Project Perparation .238
16.1.2 Project Planning .240
16.2 FDR Equipment .242
16.2.1 Reclaimer .243
16.2.2 Stabilizing Agent and Additive Application Equipment .244
16.2.3 Motor Grader .244
16.2.4 Water Truck .246
16.2.5 Haul Trucks .246
16.2.6 Compactors .247
16.3 Pulverization .250
16.4 Mixing and Placement .253
16.5 Addition of Corrective Aggregate .255
16.6 Addition of Stabilizing Agent .255
16.7 Addition of Stabilizing Additive .257
16.8 Compaction .257
16.9 Curing .259
16.9.1 Initial Curing .260
16.9.2 Intermediate Curing .260
16.9.2.1 Bituminous Stabilizing Agents .260
16.9.2.2 Chemical Stabilizing Agents .261
16.9.3 Final Curing .262
16.9.4 Micro Cracking (Optional, Cementitious Stabilization Only) .262
16.10 Surface Course .263

CHAPTER 17: FULL DEPTH RECLAMATION PROJECT SPECIFICATIONS AND INSPECTION .265

17.1 Quality Assurance .266
17.2 Project Specification and Inspection Guidelines .267
17.2.1 General Description .268

17.2.2 Preconstruction Personnel Training 268
17.2.3 Treatment Depth 268
17.2.4 Material Requirements 268
17.2.5 Mix Design 269
17.2.6 Equipment Requirements 270
17.2.6.1 Spreaders/Distributors 270
17.2.6.2 Additive Slurry Storage and Supply Equipment 270
17.2.6.3 Mixing/Reclaiming Equipment 270
17.2.6.4 Motor Grader 271
17.2.6.5 Rollers 271
17.2.6.6 Water Trucks 271
17.2.6.7 Curing, Fog Sealing and Sand Spreading Equipment 271
17.2.7 Construction Methods 272
17.2.7.1 Roadway Preparation 272
17.2.7.2 Weather Limitations 272
17.2.7.3 Control Strip 272
17.2.7.4 Pulverization 273
17.2.7.5 Moisture Control 274
17.2.7.6 Stabilizing Agent and Additive Application 275
17.2.7.7 Mixing 276
17.2.7.8 Compaction 278
17.2.7.9 Finishing 280
17.2.7.10 Curing 281
17.2.8 Surface Grade and Cross-Slope 282
17.2.9 Surface Smoothness 282
17.2.10 Traffic 282
17.2.11 Maintenance 282
17.2.12 Surfacing 282
17.2.13 Quality Control and Owner Agency Acceptance Testing 283
17.2.14 Measurement and Payment 283
17.3 Special Provisions 284

PART 6: APPENDIX

Appendix A: Glossary of Terms 285
Appendix B: Glossary of Acronyms 297
