

Chapter 7

PERFORMANCE GAPS: SUPPLEMENTAL INFORMATION

PERFORMANCE GAPS: SUPPLEMENTAL INFORMATION

Overview

Chapter 3 of the TAMP describes MnDOT's business practices, performance measures, and targets used to monitor and report asset conditions, as well as the new target terminology used in the TAMP. Figure 3-1 summarizes these new key terms associated with targets, which now override the language used to describe performance outcomes in MnSHIP. Moving forward, MnDOT will use the term "target" to denote desired outcomes. The term "plan outcome" will be used to identify outcomes to which MnDOT is managing, while the term "expected outcome" will be used to demonstrate the results of predictive modeling performed using various analytical tools.

Note:

Chapter 7 of the TAMP contains all the necessary information pertaining to current and targeted performance levels. Hence, no additional information is provided in this chapter of the Technical Guide.
