Subject: Cost Index – 2006 First Quarter

The Minnesota Highway Construction Composite Cost Index for the first quarter of 2006 is 198.82, up 29.25 from the first quarter of 2005 or 17%. The first quarter index was based on \$71.5 million of work considered from 25 projects.

First Quarter 2006 Indicator Costs

Item	Quantity	Cost	Unit Cost
Excavation	1,355,676 CY	\$4,882,679.12	\$3.60/CY
Reinforcing Steel	2,909,320 lb	\$2,666,448.51	\$0.92/lb
Structural Steel	903,620 lb	\$1,073,809.76	\$1.19/lb
Structural Concrete	22,756 CY	\$9,328,478.85	\$409.93/CY
Concrete Pavement	90,239 CY	\$8,472,128.87	\$93.89/CY
Plant-Mixed Bituminous	1,205,011 ton	\$45,050,216.25	\$37.39/ton
Total		\$71,473,761.36	

First quarter, 2006 project information is compared to first quarter 2005 below.

Minnesota Highway Construction Project Summary

	2005 Q1	2006 Q1
Number of Projects Awarded	63 ¹	55
Awarded Amount (\$ million)	\$346.0 ¹	\$145.5
Total Number of Bidders	286 ¹	226
Average Number of Bidders	4.5 ¹	4.1
Number of Cost Index Projects	34	25
Cost Index Amount (\$ million)	\$46.9	\$71.5
Excavation Index	91.95	179.64
Structures Index	201.24	194.19
Surfacing Index	172.12	206.48
Composite Cost Index (CI)	169.57	198.82

¹ Includes S.P. 1017-12 Design Build, award amount \$238.1 million.

The average number of bidders per project was 4.1 for the first quarter of 2006. In comparison, the average number of first quarter bidders in 2005 and 2004 were 4.5 and 4.9 respectively.

Attached is an explanation of the derivation of the Minnesota Cost index, charts of quarterly and annual Minnesota highway construction cost trends and a table and chart comparing the yearly Minnesota Composite Cost Index with the latest yearly FHWA Index.

Analysis:

Fuel prices have risen further in the last few months and continue to impact construction costs. The Energy Information Administration cites increased crude oil prices, production decreases due to refinery unit shut downs for the deferred fall maintenance, relatively strong demand despite high prices and the transition from using MTBE to ethanol in Reformulated Gasoline.

Unit prices for the first quarter of 2006 are comparable to prices from the fourth quarter of 2005, with the exception of excavation which rose 36%. Fuel costs have contributed to the higher excavation costs, but most of the cost is attributable to smaller quantities of work from the projects considered.

Looking forward, bituminous prices are expected to rise substantially throughout the summer, possibly \$1-\$2 per ton per month, while price increases for excavation, concrete and steel should be moderate and in line with the inflation projection of 5% for the year.

Minnesota Construction Cost Index

The Minnesota Construction Cost Index is an indicator of price trends for highway construction.

It is composed of six indicator items: roadway excavation, to indicate the price trends for all roadway excavation; concrete pavement and plant-mixed bituminous, to indicate the price trend for all surfacing types; and reinforcing steel, structural steel, and structural concrete, to indicate the price trend for structures.

Each quarter, an average unit price is computed for each indicator item. The unit price is based upon the actual bids from projects **excluding Design Build projects**, costing more than \$100,000, and let during that quarter. These unit prices include the cost of material, labor, equipment, overhead and profit.

These unit prices along with the 1987 base unit prices are used to compute the Construction Cost Index. Additionally, the 1987 quantities are used to combine these indices as shown above into an excavation index, a surfacing index, a structures index and a composite index.
