**TO:** Addressees

**FROM:** Mary Lacho  
 Estimates Engineer

**DATE:** January 14, 2014

**SUBJECT:** Cost Index – 2013 Third Quarter

The Minnesota Highway Construction Composite Cost Index was not computed for the third quarter of 2013 due to the absence of data for the six indicator items. Without a unit price for each indicator item, the resulting index is not comparable to previous indices.

Third quarter, 2013 project information is compared to third quarter, 2012 below.

**Table 1: Indicator Costs**

The average number of bidders per project was 3.4 for the third quarter of 2012. In comparison, the average number of third quarter bidders in 2013 was 2.7

Attached is an explanation of the derivation of the Minnesota Cost index, charts of quarterly and annual Minnesota highway construction cost trends and a table and chart comparing the yearly Minnesota Composite Cost Index with the latest yearly FHWA Index.

# Minnesota Construction Cost Index

The Minnesota Construction Cost Index is an indicator of price trends for highway construction.

It is composed of six indicator items: roadway excavation, to indicate the price trends for all roadway excavation; concrete pavement and plant-mixed bituminous, to indicate the price trend for all surfacing types; and reinforcing steel, structural steel, and structural concrete, to indicate the price trend for structures.

Each quarter, an average unit price is computed for each indicator item. The unit price is based upon the actual bids from projects **excluding Design Build projects**, costing more than \$100,000, and let during that quarter. These unit prices include the cost of material, labor, equipment, overhead and profit.

These unit prices along with the 1987 base unit prices and quantities are used to compute the Excavation, Surfacing, Structures and Composite Index.

and no longer provide the reports necessary to complete the comparison graphs.**
