## RE: Highway Construction Cost Index – 4<sup>th</sup> Quarter/Year End 2017

The Minnesota Highway Construction Composite Cost Index was not computed for the 4th Quarter 2017, due to the absence of data for the Structural Steel indicator item. Without a unit price for each indicator item, the resulting index is not comparable to previous indices.

• The average Excavation cost was \$5.32/CY, up \$1.74/CY from the 4th Quarter of 2016. Nine (9) projects were considered this quarter.

• The average Reinforcing Steel cost was \$1.23/lb, up \$0.17/lb from the 4th Quarter of 2016. Seven (7) projects were considered this quarter.

• The average Structural Concrete cost was \$847.93/CY, up \$1.59/CY from the 4th Quarter of 2016. Seven (7) projects were considered this quarter. Similar to the 4<sup>th</sup> Quarter of 2016, the average price for Structural Concrete is high. The price this Quarter was influenced by SP 3606-61 which included bridge construction at a remote location as well as some bridge repair projects.

• The average Concrete Pavement cost was \$139.35/CY, down \$170.34/CY from the 4th Quarter of 2016. Two (2) project were considered this quarter. The quantity of Concrete Pavement included in the 4th Quarter of 2016 was small, which resulted in a higher price that Quarter. The price this Quarter is actually down \$1.31 from the 4th Quarter of 2015.

• The average Plant Mixed Bituminous cost was \$50.91/ton, up \$8.91/ton from the 4th Quarter of 2016. Seventeen (17) projects were considered this quarter. The cost increase is due, in part, to the increase in the price of the oil used in the bituminous mixture and the increase in fuel. Poten and Partners and *OPIS Energy Group tabulation titled "RackFax, Minneapolis, MN, OPIS Direct Gross No. 2 Distillate Fuel"* are reporting increases in the cost of Oil and Fuel respectively.

The average number of bidders per project was 4.73 for 4<sup>th</sup> Quarter of 2016. In comparison, the average number of bidders in the 4<sup>th</sup> Quarter of 2017 was 4.74.

4<sup>th</sup> Quarter 2017 project information is compared to 4<sup>th</sup> Quarter 2016 below.

	4th	Quarter 20	16	4th Quarter 2017				
Item	Quantity	Cost *	Unit Cost	Jnit Cost Quantity Cost * Unit Cost

### **Table 2: Minnesota Highway Construction Project Summary**

\*\* Not computed due to the absence of data for associated indicator items.

## Year End – 2017

The Minnesota Highway Construction Composite Cost Index for 2017 is 281.23, with no data for comparison in 2016 due to the absence of data for the Structural Steel indicator item. Without a unit price for each indicator item, the resulting index is not comparable to previous indices.

• The average Excavation cost was \$5.88/CY, up \$1.24/CY from 2016. Thirty-two (32) projects were considered this year.

• The average Reinforcing Steel cost was \$1.21/lb, up \$0.02/lb from 2016. Thirty (30) projects were considered this year.

• The average Structural Steel cost was \$1.56/lb, with no data for comparison in 2016. Two (2) projects were considered this year.

• The average Structural Concrete cost was \$617.40/CY, down \$102.20/CY from 2016. Thirty (30) projects were considered this year. This decrease in price is due to the complexity of the concrete rail construction on a large project included in the 2016 Cost Index which caused price to be usually high that Quarter.

• The average Concrete Pavement cost was \$141.14/CY, up \$1.30/CY from 2016. Twelve (12) projects were considered this year.

• The average Plant Mixed Bituminous cost was \$49.45/ton, up \$6.24/ton from 2016. Seventyseven (77) projects were considered this year. The increase is due, in part, to the increase in the price for the oil used in the bituminous mixture.

The OPIS Energy Group tabulation titled "RackFax, Minneapolis, MN, OPIS Direct Gross No. 2 Distillate Fuel" is also reporting an increase in the price of fuel.

The average number of bidders per project was 3.89 in 2016. In comparison, the average number of bidders in the 2017 was 4.08.

2017 project information is compared to 2016 below.

		2016		2017				
Item	Quantity	Cost *	Unit Cost	Quantity	Cost *	Unit Cost		
Excavation	2,362,112 CY	\$10.96	\$4.64/CY	4,617,598 CY	\$27.14	\$5.88/CY

**\*\*** Not computed due to the absence of data for associated indicator items.

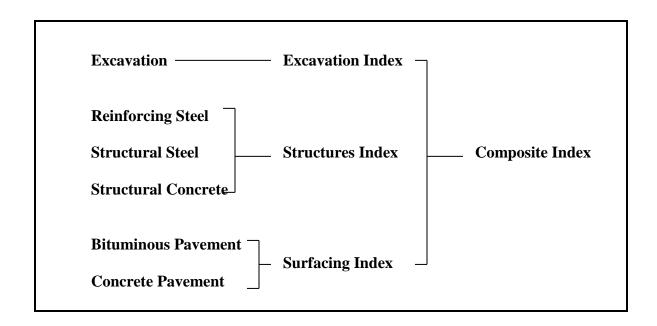

Attached is an explanation of how the Minnesota Cost index is computed, as well as charts of quarterly and annual Minnesota highway construction cost trends.

Attachments

# **Minnesota Construction Cost Index**

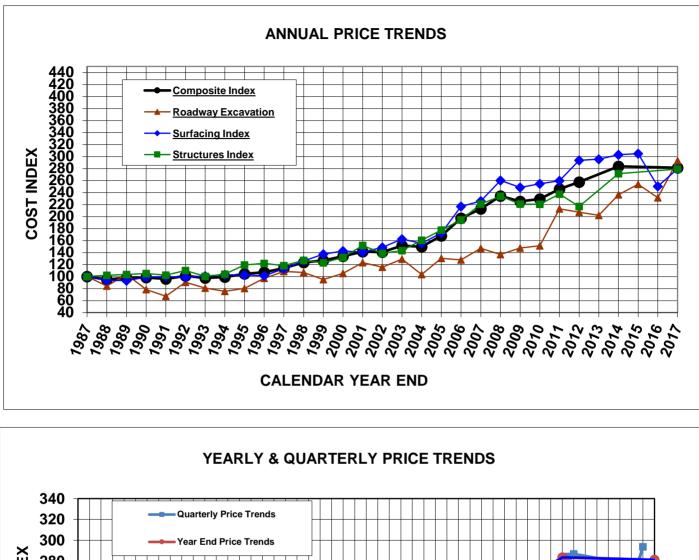

The Minnesota Construction Cost Index is an indicator of price trends for highway construction.

It is composed of six indicator items: roadway excavation, to indicate the price trends for all roadway excavation; concrete pavement and plant-mixed bituminous, to indicate the price trend for all surfacing types; and reinforcing steel, structural steel, and structural concrete, to indicate the price trend for structures.

Each quarter, an average unit price is computed for each indicator item. The unit price is based upon the actual bids from projects **excluding Design Build projects**, costing more than \$100,000, and let during that quarter. These unit prices include the cost of material, labor, equipment, overhead and profit.

These unit prices along with the 1987 base unit prices and quantities are used to compute the Excavation, Surfacing, Structures and Composite Index.

**Minnesota Highway Construction Cost Trends** 

(Year end price trend line corrected 2007-2015)

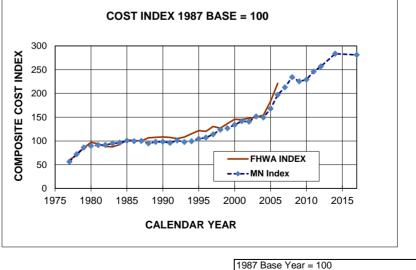

#### NOTE: In 2007, the FHWA stopped collecting Price Trend data,

and no longer provide the reports necessary to complete the comparison graphs.
