**CONCRETE PARAPET TYPE P-4, TL-4**

**FOR INTEGRAL OR SEMI-INTEGRAL ABUTMENT**

**GENERAL NOTES**

- Measure payment length between the outside ends of the parapet.
- For slipform construction, the most distant point shall be used to determine the length.
- Concrete parapet = 639 lbs./ft. (0.158 cu. yds./ft.)
- Parapet quantities are listed on summary of quantities for superstructure.
- Slab thickness is determined by the distance between parapet face dimensions and the parapet height.
