

Importing Atlas 14 Data into HydroCAD

Export Data from Atlas 14 Precipitation Data Frequency Server

Data should be exported and edited so that when open in a text editor it looks like file below. See helpsheet

Downloading Data Using Internet Explorer 8 on the Atlas 14 web page.

http://ihub/bridge/hydraulics/atlas14/pdf/Atlas_14_DownloadingDataUsingInternetExplorer8.pdf

```
Point precipitation frequency estimates (inches),,,,,,,,,,
NOAA Atlas 14, Volume 8, Version 2,,,,,,,,
Data type: Precipitation depth,,,,,,,,
Time series type: Partial duration,,,,,,,,
Project area: Midwestern States,,,,,,,,
Latitude (decimal degrees): 44.8773,,,,,,,,
Longitude (decimal degrees): -93.0045,,,,,,,,
,,,,,,,,
PRECIPITATION FREQUENCY ESTIMATES,,,,,,,,
by duration for ARI: 1,2,5,10,25,50,100,200,500,1000 years
5-min: 0.36,0.42,0.54,0.63,0.77,0.89,1.13,1.3,1.43

12-hr: 2.12,2.48,3.18,3.87,4.98,5.96,7.05,8.26,10.04,11.51
```

Open Data file in HydroCAD

Copy file to directory with HydroCAD project file

Rename file and change extension of atlas 14 data to
“hci”

(If extensions not shown, then go to windows explorer
and select Tools > Folder Options > View and toggle
off Hide Extensions for known file types.

Double click on the hci file in Windows Explorer to verify that it opens in HydroCAD

Import Atlas 14 Rainfall Data into HydroCAD Project

Open project and go to Settings > Calculation > Rainfall

Select More Storms

Select the Convert Tab

Click on the dropdown arrow by Rainfall IDF File and select the rainfall distribution.

Select Options button

Select the S0 (none) smoothing option and OK

Toggle off Return Periods not used

Select Create Mass Curves

Confirm Store curves in project file

Confirm Select new Storm file

For message box asking to replace all current rainfall events:

- If new project and just using Atlas 14 rainfall, then click on Yes.
- If existing project and you want to keep previous rainfall information the project, then click on No.

Rainfall events can then be selected from the Calculations Settings dialog or from the drop down Events on the main view.

Optional: Rainfall events can be renamed on the Calculation Settings Rainfall dialog.

Select the rainfall event

Edit the name

Select Save – this creates a new rainfall event

Delete rainfall event with non-edited name

Compare Rainfall Distributions

To compare the storm distribution, select View > Storm Distribution

Toggle on/off storms to compare. For this location, the Atlas 14 rainfall distribution is more intense than the NRCS Type II distribution.

Compare results from multiple events

The results from multiple rainfall events can be displayed in tabular form. Go to a node and double click to bring up the results dialog.

Select the Events tab

Click on the Update button

The screenshot shows the 'Pond trap: trap pond - ExistPropMod4' dialog box with the 'Events' tab selected. The 'Update' button in the bottom right corner is circled in red.

Event	Inflow (cfs)	Outflow (cfs)	Primary (cfs)	Secondary (cfs)	Elevation (feet)	Storage (acre-feet)
100-yr Atlas 14	56.39	35.21	35.21	0.00	717.22	1.127

The computed results from all of the storm events in the project will be computed and displayed in the table.

The screenshot shows the 'Pond trap: trap pond - ExistPropMod4' dialog box with the 'Events' tab selected. The table displays results for various storm events.

Event	Inflow (cfs)	Outflow (cfs)	Primary (cfs)	Secondary (cfs)	Elevation (feet)	Storage (acre-feet)
.25 inch	0.00	0.00	0.00	0.00	710.80	0.000
1 inch	3.97	3.96	3.96	0.00	711.79	0.005
1 year	10.50	10.48	10.48	0.00	712.58	0.009
1-yr Atlas 14	21.32	18.12	18.12	0.00	713.65	0.094
2 year	25.79	20.95	20.95	0.00	714.02	0.155
2-yr Atlas 14	25.02	20.95	20.95	0.00	714.02	0.155
10 year	39.81	28.05	28.05	0.00	715.24	0.440
10-yr Atlas 14	38.73	28.42	28.42	0.00	715.33	0.466

Multiple events can be included in the report as desired by selecting appropriate events from the Print > Report dialog.

The screenshot shows the 'Print Report' dialog box. The 'Selected Events' list is circled in red. The 'Include' section shows '1 Selected Node(s)' selected. The 'Sort By' section shows 'Node Type & Number' selected. The 'Project Report Items' section shows 'Pipe Listing' and 'Totals' selected. The 'Node Report Items' section shows 'Summaries', 'Notes', 'Wizards', 'Hydrograph Plots', and 'Messages' selected.

Rainfall:
☐ Current Rainfall
☒ Selected Events:

- ☒ .25 inch
- ☒ 1 inch
- ☒ 1 year
- ☒ 1-yr Atlas 14
- ☒ 2 year
- ☒ 2-yr Atlas 14
- ☒ 10 year

Include:
☐ All 13 Nodes
☒ 1 Selected Node(s)
Node Type: (any)

Sort By:
☒ Node Type & Number
☐ Node Number Only

Project Report Items:
