

S.P. 8503-46  
Highway 43 Winona Bridge Project  
Industry Outreach Meeting  
July 29, 2013  
Questions From the Attendees

1. Will there be a cost component in the Design RFP?

*Yes a cost component is anticipated in the Design RFP's.*

2. Is MnDOT considering having a Quality Program as a part of the design or construction RFP?

*This will be determined when we have the CMGC team onboard to facilitate this discussion with our project team.*

3. Will there be a Hydraulics Design Component in the consultant contract? For example design dealing with River Hydraulics and floodplain.

*There will be a hydraulics design component in the consultant contracts, for bridge deck drainage, storm water pond designs and storm sewer designs. River Hydraulics is anticipated to be a MnDOT Scope of Work.*

4. Will MnDOT be posting a Draft RFP for the other Consultant Contracts?

*MnDOT is not anticipating doing this but consultants should closely watch the MnDOT Consultant Services website in case the decision is made to do so.*

5. Will there be minimum qualification for key personnel in the Consultant RFP's if the Draft isn't posted?

*The Key Personnel minimum qualifications are not likely to differ from traditional consultant contracts.*

6. The Peer Review 85851 will focus on the Bridge and would not include the Roadway portion.

*MnDOT concurs.*
