Online Permit Application

You can now use your computer to apply for and receive most permits - 24/7!

- Set Up An Account
- Apply For A Permit (Requires User ID and Password)
- Log Trips Online** (Requires Permit Number and Unit License Number)
- Sign Up To Receive Bulletins
- User's Guide

Requirements for Ordering Permits

Each vehicle for which you are requesting a permit, you will need to provide:

- Vehicle make
- Vehicle type
- Vehicle empty weight
- Vehicle license number(s)
- Width
- Length
- Number of axles
- Load description
- Route information
- Net weight of load
- Load overhang (if any)
- Vehicle identification number (VIN) for annual/seasonal permits

General Conditions and Restrictions
If your gross vehicle weight (GVW) **exceeds** 10,000 lbs., you may need a **USDOT number**.

Attention
If you are experiencing problems with our On-line Permits application form (where some portions of the form are grayed-out), [CLICK HERE](#) for a solution.

4 Ways to Apply

- Online** - Requires User ID and Password

Hours of Operation

Monday - Friday
Phone
6:30am - 4:00pm

Permit Processing

Applications sent to the Transportation Permits Section after normal business hours will be processed the next business day.

Permit applications that require specialized handling may take from two to five business days to process, depending on complexity.

Examples include, but are not limited to:

System Requirements

To use a previous trip as a template for a new trip

Actual Length, Height, Width and Gross Vehicle Weight (GVW) listed here.
NOTE: This is the specific format showing how these numbers must be entered.

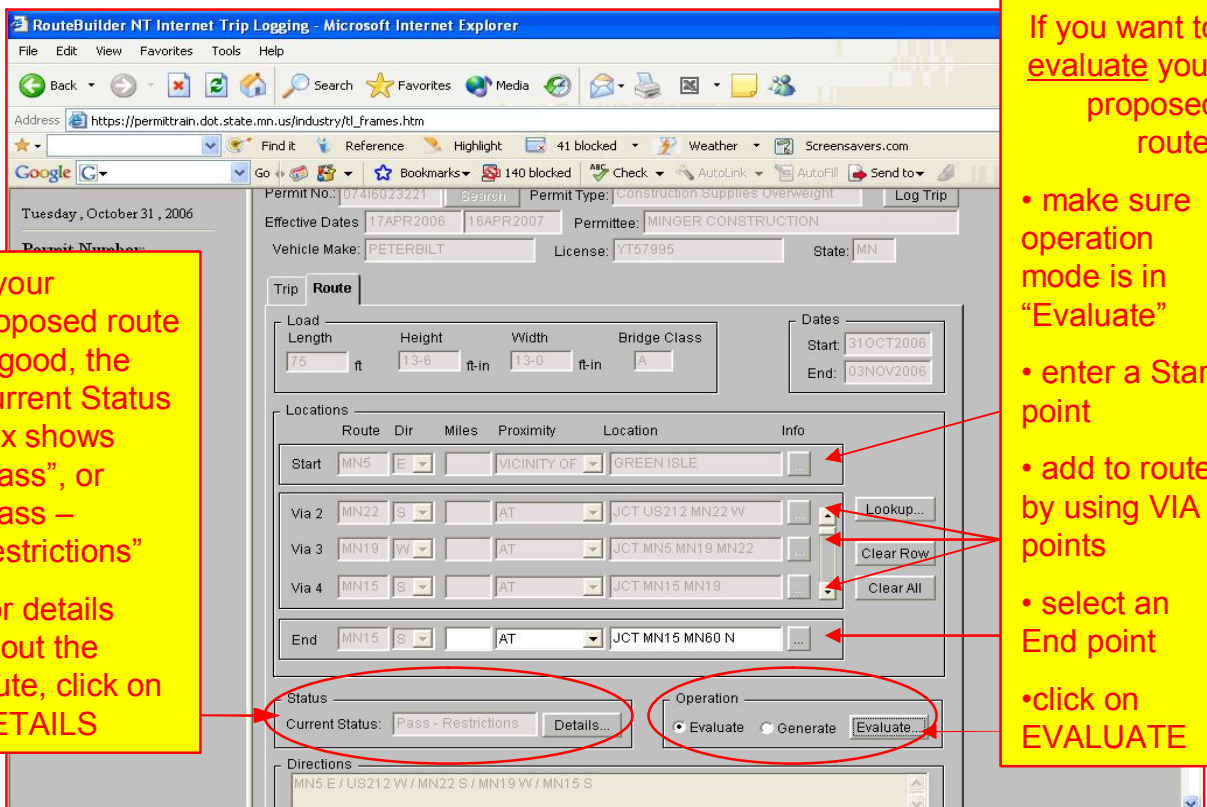

If your proposed route is good, the Current Status box shows "Pass", or "Pass - Restrictions"

For route details click on DETAILS

When routing under the GENERATE mode, enter only the Start and End route points

If your proposed route is good, the Current Status box shows "Pass", or "Pass - Restrictions"

For details about the route, click on DETAILS

If you want to evaluate your proposed route:

- make sure operation mode is in "Evaluate"
- enter a Start point
- add to route by using VIA points
- select an End point
- click on EVALUATE

TIP: If your proposed route fails, you can click on DETAILS to find out where exactly it failed. You should then check our Permit Bulletin to see if there are construction projects or other restrictions that may be affecting your proposed route.

This is the type of route detail displayed when you select the DETAILS button (see previous slide)
