Permittable Axle Weights

Single: 20,000 per axle

Tandem 20,000 per axle
w/ bridge checks may be eligible for 23,000 per axle

Tridem 20,000 per axle

Quad With a group spacing below 14'1" 18,000 per axle

Over 14'1" group spacing may be eligible for 20,000 w/ bridge check

Tire Law

All tires cannot exceed 600 lb/in (inch of tire) x (600) x (# of tires on axle) = allowable weights per axle

Route Survey Criteria

Physical route surveys are required when any of the following exceeded: 15'6" High or 185'0" Long or 19'0" Wide. Minimum clearances include: 1'0" on each side of vehicle/load; 1'0" under load clearance; 6 inches under trailer/semi-trailer clearance; and 6 inch clearance under overhead obstacles. A physical route survey is only valid when the surveyor verifies the noted route will allow safe travel and sufficient clearance for the noted dimensions. The survey must not be performed earlier than 14 days prior to permit start date. We require the 6-digit Mn/DOT Application Number written on each route survey form to match with applications.

Duluth's major arterial roadways continue to undergo renovations thru the end of the 2012 season. Carriers may be required to use alternative roadways to access US, State Trunk, and Interstate roadways beyond construction restrictions. Carriers traveling these alternative roadways should contact both City of Duluth and St Louis County for travel on those alternative roadways.
