Hwy 371 Study

As you may know, MnDOT will be reconstructing Hwy 371 through Hackensack (between County Road 40 and County Road 5) in the next few years. The goals of the study are to enhance mobility, safety, and local access, while also improving drainage and pedestrian facilities. Benefits include:

*Improved
safety for all
users*

*Speed
reduction
measures*

*Improved or
new bike and
pedestrian facilities*

*County Road 5 and
Hwy 371 intersection
reconstruction*

*Drainage system
upgrades*

Change is coming to Hwy 371! See inside

for a project update and if you haven't already, don't forget to visit the project website to sign up for the mailing list, receive updates and learn about opportunities to get involved.

HACKENSACK, MN

PROJECT UPDATE:

Over the past few months, our project team has been regularly meeting with a Stakeholder Advisory Committee to help shape the vision for the Highway 371 corridor and to provide input on design alternatives to best meet that vision's needs. The committee is also helping to identify issues in the community and act as ambassadors for sharing information about the project to encourage

participation. Additional engagement also occurred at key community events that took place this fall. The corridor vision that we are creating is important to establish at the beginning of the study because it will help guide the future design for the project. Our project team will continue engaging the community throughout the different stages of the project.

Project Schedule

CORRIDOR DESIGN:

Based on stakeholder and community input, MnDOT identified an initial concept to move forward for additional review and development. This concept stays within the existing MnDOT right-of-way, with the goal to enhance mobility and safety for all users.

▲ Conceptual Design Rendering:

The design concept shown includes one travel lane in each direction, a center turn lane, and sidewalks and parallel parking on both sides through the downtown area. A roundabout is being considered at the intersection of Highway 371 and County Road 5.

LOCAL BUSINESS MEETINGS:

Before we further develop this concept, MnDOT will be meeting with several businesses along the corridor to discuss the design features and gather input. A member from our project team will be reaching out directly to adjacent property owners to schedule one-on-one meetings in early December. Those businesses will be

receiving a call from our project team within the week. However, we are happy to meet with any interested business owner in the area. If you do not receive a call from our project team but would like to schedule a meeting, please contact tess.nejedlo@hdrinc.com. *All meeting requests are welcome!*
