

# Traveling Safely through the Work Zone

## Pilot Car Safety

This construction project will be using a signed car to lead traffic through the construction work area at a safe speed. This car is called a pilot car. A "PILOT CAR FOLLOW ME" sign will be displayed on the rear of this vehicle.

There will be only one lane of traffic open at certain times during this project. A flagger will release traffic to follow the pilot car to the other end of construction where a second flagger will be holding traffic from the opposing lane. Traffic will only be released to a pilot car going in the same direction.

If you are entering the roadway where crews are working by a driveway or intersection, you must wait for the pilot car and vehicles following to pass you. Then you must travel in the same direction as the pilot car.

**Do not travel in the opposite direction of the pilot car and the vehicles following it.**
