### Project Summary

**State Project 2004-22**  
**State Highway 30**  
**Bridge Replacement Project**

**Schedule:**
- **Construction Start:** June 16, 2016  
- **Construction End:** September 2016

**Project Location:**  
This Bridge replacement project is located on Highway 30, 650’ east of Dodge County Road 15 and approximately 6.9 miles east of Hayfield.

**Project History:**
- The existing Bridge #6746 was constructed in 1951.  
- Bridge #6746 is a single-span bridge with steel beam spans over an unnamed waterway.

**Project Description:**
- This project replaces the existing single-span bridge #6746 over an unnamed waterway with a new bridge #20014.

**Project Benefits:**
- The proposed bridge will include two 12-foot lanes, two 6-foot shoulders, new bridge railing and guard rail.  
- The new bridge will be wider than the existing bridge for improved safety.

**Project Length:**  
The length of the project is limited to the replacement of the bridge and the bridge roadway approaches.

**Estimated Construction Cost:** $658,000

**Proposed Detour:**  
Highway 30 traffic will be detoured for the duration of the project using local roadways. The proposed detour is on Dodge County Road 15, Dodge County Road 4, Olmsted County Road 26 & Olmsted County Road 3. The approximate length of the detour is 7 miles. (see map above)
