

Highway 212 J-turn Projects

Hwy 212/County Road 1 and Hwy 212/Hwy 22

Project Summary

The Minnesota Department of Transportation is preparing to build two J-turn intersections on Highway 212 in Glencoe.

The J-turn located at the intersection of Hwy 212 and County Road 1 includes a permanent snow fence to reduce drifting and blowing snow and improvements for people who walk and bike.

The J-turn at the intersection of Hwy 212 and Hwy 22, or Chandler Avenue, is a partial J-turn, which means it has one U-turn instead of two.

The purpose of these projects is to enhance safety for vehicles and pedestrians.

Both of the Hwy 212 J-turns are designed to accommodate vehicles of all sizes, including large trucks, emergency vehicles and agricultural equipment.
