RFQ Clarification**

Date: 03/01/09

Clarification#: 6

Clarification No.	Volume & Section	Question or Comment	Mn/DOT Response
6.1	3.7.2	Does the disclosure for item (a) require subcontracts to be a prime under contract to Mn/DOT whereby the Mn/DOT contract may be attached by reference as a subcontract?	Section 3.7.2 requires proposers to disclose any current contractual relationships. Technically, a subcontractor does not have a contractual relationship with Mn/DOT so the subcontractors Mn/DOT contract numbers and project managers are not required. However, the first paragraph of 3.7.2 requires proposers to identify an organizational conflict of interest of any kind, including those attributed to their team members who may have or had a conflict while acting in the role as a subcontractor.
6.2	3.7.2	Can the disclosure of current contractual relationships with firms listed in Section 2.7 be limited to work performed in the State of Minnesota?	Yes. However, as per the previous question, proposers are required to disclose an organizational conflict of interest of any kind associated with this project, including those with the firms listed in 2.7 for contractual relationships outside of the State of Minnesota.
