Summary

This report includes data on 31 contracts executed between July 1, 2009 and June 30, 2010 that meet the definition of "Privatization Transportation Contracts" in the Taxpayers' Transportation Accountability Act (TTAA). Appendix A provides a detailed breakdown for each contract.

- The 31 contracts have a total value of \$20,371,476.
- 12 of the contracts have a value greater than \$250,000. The total value of these contracts is \$16,774,052.
- 19 of the contracts have a value between \$100,000 and \$250,000. The total value of these contracts is \$3,597,424.

Of the 49 contracts in last year's report, that were executed in fiscal year 2009 (July 1, 2008 to June 30, 2009)

- 8 contracts have been completed and closed
 - 4 of those 8 were completed for an amount less than Estimate A (in-house).
 - 7 of those 8 were completed for an amount less than Estimate B (out-source).
 - One contract was amended
- 9 contracts have been completed and are awaiting information for audit.

Contracts will be listed until they are closed out. Once closed, they will be listed with the final amounts and then dropped in subsequent reports.

Narrative

The report submitted by Mn/DOT in 2009 described in great detail the steps taken by Mn/DOT to implement the Taxpayer's Transportation Accountability Act (TTAA). The narrative in this report has therefore been limited to describing significant developments in Mn/DOT's implementation of the TTAA during the past year.

Since the last report was filed, Mn/DOT held several meetings with representatives of those labor unions (AFSCME and MGEC) whose members are most affected by Mn/DOT's implementation of the law. Mn/DOT also held meetings with representatives of the American Council of Engineering Companies – Minnesota Chapter (ACEC-MN), a trade group representing consultant engineers. The purpose of these meetings was to provide regular updates on Mn/DOT's implementation of the law, to review estimates prepared in compliance with the TTAA and to have ongoing discussions concerning the appropriate level of staffing of engineering and technical positions at Mn/DOT. These meetings have also provided a forum for discussions of future projects for which Mn/DOT has plans to award consultant contracts.

Mn/DOT has developed a centralized resource, in the Office of Project Scope and Cost Management, to give Mn/DOT project managers more consistent direction in preparing the estimates. That effort has resulted, for example, in providing clearer guidelines as to when it is appropriate to include "construction delay inflation rates" and "new hire additives" as part of the statutorily-required comprehensive estimates. In addition, Mn/DOT is working to automate the process in ways that will improve the accuracy and completeness of TTAA-required estimates.

During the past year, Mn/DOT continued to experience a temporary spike in workload (which started in early 2009) due to the American Recovery and Reinvestment Act. Short-term and temporary infusions of funding, such as ARRA, commonly result in the need for using consultant contracts, as department staff may be unavailable to deliver the projects in the time required. As the reader will see from this report, the vast majority of the Mn/DOT's decisions to contract out certain services result from either the need for specialized expertise not held by Mn/DOT employees or from Mn/DOT staff being unable to deliver the work within given time constraints.

Work Types

This is a list of the work types subject to the law

Preliminary Design

Environmental Documentation

- Study and evaluation of the social, economic and environmental effects on the human and natural environment
- Public involvement and interagency coordination
- Potential mitigations

Geometric Layouts

- Base map, alignment, traffic staging
- Intersections, culverts, noise and retaining walls
- Culverts, sewers, erosion control

Detail/Final Design (of highway)

- Detailed construction plans for bid letting
- Special Provisions (in addition to standard specifications)
- Estimated construction quantities and costs

Roundabout Designs

Bridge Design

- Preliminary and detailed/final design for bridge construction

Bridge Study

- Preliminary engineering of bridge needs, types, aesthetics, etc.

Bridge Inspection

Structural Metals Inspection

- Fabrication inspection of major and minor bridge components

High Mast Light Towers

- Inspection and documentation of all corrosion and weld cracking

Material Testing

Roadway Material Testing

- Sampling and testing construction materials for specification conformance

Land Surveys

Geodetic Control Surveying

- High accuracy survey to establish precise coordinates of survey bench marks

Design/Location Surveys

- Field location data for the project design process

Right of way Surveys

- Alignment, property corners, right of way monuments to establish a right of way base map

Land Surveys

- Research and analysis of information regarding section corner monuments of the Public Land Survey System; collection and compilation of field location data; reports; graphical and data files

Construction Inspection/Contract Administration

Construction inspection is to ensure work performed on state construction projects is in compliance with the contract documents, special provisions, standard specifications, policies, procedures, and regulations. Inspection is categorized as: grading and base, bituminous and concrete; bridge construction; construction surveying, computation, staking and marking to establish lines, slopes, elevations, points, and profile grades to assist construction of the road design plan; material sampling and testing of all material used on the project, submittal to lab for testing; plant inspection, both bituminous and concrete plants.

Construction Support

- Critical path (schedule) management, field design revisions, etc.

Hydraulic Structure Inspection

Clean, video tape, and inspect storm sewer system, locate structures, use Global Positioning System (GPS), create map and report.

Traffic Engineering

- Traffic Signal Design
- Traffic Signal Operations
- Roadway Lighting Design
- Temporary Traffic Control Plan Design
- Signing Plan Design

Estimate Format

This is an example of the spread sheet being used to develop the detailed cost estimates. The estimate is a matrix, listing the tasks or activities to be performed, and the number of estimated hours by each employee classification to complete each task or activity. Other anticipated expenses are added. This estimate is sent to the budget office, where any applicable additives, as shown in Appendix C, are applied. The final cost estimate is reviewed and signed by the District Engineer or Office Director.

These estimates are then compiled onto the summary spread sheet in Appendix A.
