¹ Includes only General Fund amounts appropriated to supplement Trunk Highway construction and related engineering and support.

² Larger construction projects can take several years to complete. Total project costs are appropriated in the budget for the first year of the project, but expenditures are made only as work is completed. In order to more closely track actual work completed, amounts included here are based on the fiscal year in which the charge is recorded, rather than the fiscal year for which the money was appropriated to the budget.

³ Includes maintenance, repair and replacement of existing bridges and construction of new bridges.

⁴ Construction expenditures are only for the bridge structure itself and do not include approaches and right-of-way costs included in the project.
