

**Statewide Bridge Inspection Effort
Communication Update
Friday December 21, 2007**

What is Complete:

- All 227 fracture critical and special feature bridges have had inspections completed this year. 222 were in-depth inspections and 5 were routine inspections.
- All 3875 Trunk Highway bridges have had a routine inspection completed this year.
- All 106 Trunk Highway bridges classified as structurally deficient have been inspected this year.
- All 843 local bridges classified as structurally deficient have been reported as inspected. An additional 42 of these bridges have been reported to be replaced this year.
