

# Maintenance Research Bulletin: August 2014

**NTREC New Technology Research Equipment Committee  
MOR Maintenance Operations Research**

## Rhino Snot

Rhino Snot is a high performance, environmentally-safe, low cost acrylic copolymer. When this water soluble product is applied to soils or sands, it will penetrate and coat the surface. Once dry, it forms a water-proof, UV-resistant, solid bond which binds the soil particles together. Increasing the concentration can create a highly durable surface that is hard enough to minimize surface damage and withstand heavy traffic. District 1 maintenance staff will test Rhino Snot for its ability to slow erosion, prevent washouts and its effectiveness for dust control.

## Upcoming Events

Supervisors Conference  
Detroit Lakes  
September 8-10, 2014

SPOT  
Camp Ripley  
Train the Trainer  
September 10-12, 2014

Trainees  
September 15-19, 2014  
September 22-26, 2014

For more information  
contact  
Rick Shomion  
651/366-3576

Road Weather Technology  
Meeting  
St. Cloud  
October 7, 2014

Fall Expo  
St. Cloud Public Works  
October 8-9, 2014

Towards Zero Deaths  
Annual Conference  
Duluth  
November 13-14, 2014
