Guardrail Post Pounding Unit

This self-propelled guardrail post driver will make guardrail repair fast, easy and accurate. This machine will enable crews to install posts in harsh conditions and on uneven terrain. It is designed with a compact footprint to help minimize traffic disruption and lane closures. This unit is capable of installing guardrail posts up to 13’ tall. The oversized hydraulic system has the capacity to drive a wide range of accessories including earth augers up to 24” diameter, rock drills up to 8” diameter and multi-core drill up to 4 X 28 mm (1’) diameter. District 6 Maintenance crews will evaluate this unit’s ability to reduce equipment on the job site, its ability to work on difficult terrain and its overall effectiveness on different types of guardrail applications.
