

Maintenance Research Bulletin: July 2016

**NTREC New Technology Research Equipment Committee
MOR Maintenance Operations Research**

Farewell To Ryan

As was noted as upcoming in the June 2016 Maintenance Research Bulletin, Ryan Otte departed MnDOT on July 12, 2016. This decision did not come easy for him but he has been developing his own general contracting renovation company. Ryan had worked in the Office of Maintenance for the past 9 years and previously to that, in the Metro District for 10 years. His MnDOT maintenance experience along with his technologic knowledge combined to provide the Maintenance Operations Program with a solid leader. While he will be missed, we knew that this opportunity had been a career business direction that he has been wanting to embark on for some time and we all wish him the best in his new full-time endeavor.
