

Maintenance Research Bulletin

NTREC New Technology Research Equipment Committee
MOR Maintenance Operations Research

February 2006

Mn/DOT CO Research and Training Unit Opportunities

The Mn/DOT Maintenance Operations Section will be posting two positions soon. One will be for the Maintenance Research Engineer opening which was recently vacated by Ben Zwart, and the other will be the Winter Maintenance Coordinator position. Wendy Frederickson will be returning to District 1 with a wealth of knowledge in winter maintenance procedures, equipment, and chemicals. We wish them both the best of luck in their new endeavors.

Each opening in Maintenance Research and Training offers new horizons and the chance to learn the inner workings of Mn/DOT Maintenance Operations at Central Office.

If it's time to move up in your career, broaden your knowledge, or, if you simply require a new challenge, watch for the postings, apply and take advantage of one of these unique opportunities.

Questions about the openings?
