Ramada Plaza Suites, Fargo ND
March 18-19, 2008

Congratulations to Andy Kubista. He recently accepted the Project Consultant position for the new driving simulators. Andy has been with MN/DOT since 1999 where he has served as a transportation generalist in district 6 and 7. Andy will be vacating his current position as the Winter Maintenance Coordinator.

Maintenance Research Implementation Efforts

Maintenance Research is pursuing implementation efforts and has proposed research projects for potential funding. This will include completed projects that were successful in the district where they were used. Maintenance Research would like to give thanks to the Office of Research Services for potential funding toward this process. The goal behind researching projects is to implement the projects with successful applications.

Please refer to the NTREC/MOR manual or the website at www.dot.state.mn.us/maint/research.html for help with the Research Program. It will assist with application for funding, and provides other information for successfully conducting a research project.

Listed above is the Maintenance Research staff, from left to right: Linda Taylor, Farideh Amiri, Ryan Otte and Curt Gobeli

We would like to wish you all Happy Holidays.

 **Seasons Greetings**
