## Hydraulic Plate Compactor

**This Compactor/driver combines high frequency vibration with high impact power to make quick work of any compaction or driving task for trenches, around foundations, on slopes and posts. This compactor delivers 3000 lbs of impulse force at 2000 cycles per minute assuring maximum lift compaction.**

**For more information contact:  
Brian Bustad 507/433-0554  
Transportation Generalist, D6 Austin**
