## Guardrail Sprayer

This custom built unit for a tractor will be used like a boom type guardrail sprayer. This sprayer will be used on guardrail, concrete center curbing, Jersey barrier and any other hard to reach areas for noxious weed and grass control. The operator can raise and lower the boom to avoid obstacles and can also fold the unit in against the cab for easy transport all from inside the tractor cab.

For more information contact:

Charles Frein, Transportation Generalist  
District 6 Albert Lea 507/379-3414
