

# Site map

A **computer-generated or hand-drawn** site map of the current spatial area around the plant is required to be posted in the inspection area of the ready mix plant.

Site Map should include:

- Plant name and location
- Location of aggregate piles and bins relative to the ready mix plant. Each pile should be labeled with the aggregate size and State Pit number
- Location of cementitious silos relative to the ready mix plant. Each silo should be labeled with appropriate product name and source

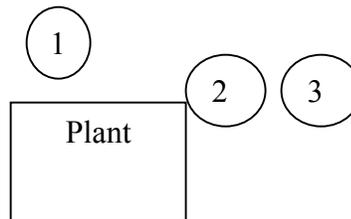

## Example:

**Silo 1: Cement**  
Grey Matter-St. Louis

**Silo 2: Fly Ash**  
Asher-Woodbury

**Silo 3: Slag**  
Joe's-Lino Lakes
