

I-94 EAST METRO

RESURFACING CONSTRUCTION PROJECT

See what construction crews did to create a smoother, safer ride on I-94 between St. Paul and Maplewood...

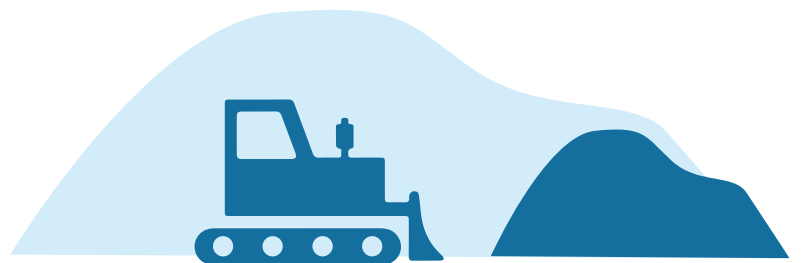

SHIFTED

the movable barrier nearly
500 TIMES
to give drivers an extra lane

HAULED

70,000 cubic yards of dirt.
That's enough to fill
5,000+ dump trucks

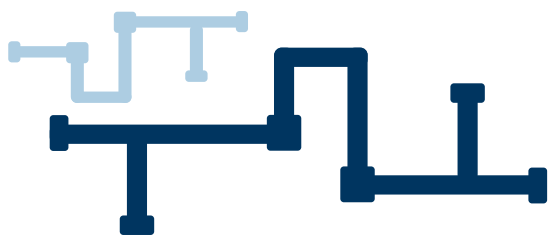

REUSED

53,000 tons of road
base material on I-94
– that's more than
7,500 elephants!

INSTALLED

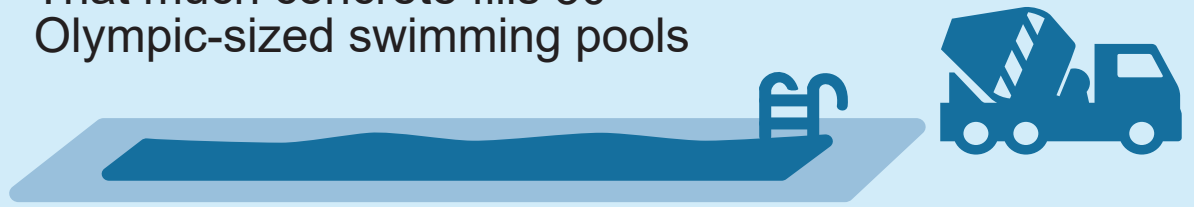

nearly 15 miles of new
storm sewer pipes to
improve drainage and
reduce standing water
on the road

POURED

about 100,000 cubic yards of
new concrete to resurface I-94
& 27 entrance/exit ramps

That much concrete fills 30+
Olympic-sized swimming pools

CONTRACTED

with 24 women-and
minority-owned businesses

PUT IN

about 3 miles of
new guardrail

REPAIRED

12 Bridges

RECONSTRUCTED

56 sidewalk entrances to improve
mobility in local neighborhoods
