

November 14, 2006

SUBJECT: ADEQUACY DETERMINATION; 2006 SUPPLEMENTAL FINAL ENVIRONMENTAL IMPACT STATEMENT; ST. CROIX RIVER CROSSING PROJECT.

To Whom it May Concern:

As the Responsible Government Unit under State of Minnesota environmental review rules, the Minnesota Department of Transportation (Mn/DOT) has determined that the 2006 Supplemental Final Environmental Impact Statement (FEIS) for the St. Croix River Crossing Project is adequate.

As described in Minnesota Rules 4410.2800, subpart 4, a FEIS shall be determined adequate if it:

- A. addresses the potentially significant issues and alternatives raised in scoping so that all significant issues for which information can be reasonably obtained have been analyzed;
- B. provides responses to the substantive comments received during the DEIS review concerning issues raised in scoping; and;
- C. was prepared in compliance with the procedures of the act and parts 4410.0200 to 4410.6500.

All conditions specified above have been satisfied. This Adequacy Determination concludes the Minnesota environmental review process. The project may proceed to final design, permitting and construction. The complete administrative record of this decision is found in the Adequacy Determination, address on the following page.

Mn/DOT Adequacy Determination
