

Construction Plans

State Aid does not save As-Builts for local projects.

Approved construction plans are saved on a State Aid for Local Transportation (SALT) directory.

To find those plans go to [Scanned Plans](#). This will take you to a read only directory for all the local projects SALT has on file.

To find the plan set you seek, you will need to understand the State Aid project number naming protocol explained in the [Project Number Format Guidance](#).

Briefly; State Aid project numbers consist of 3 sets of 3 numbers (add leading zeros as necessary): Agency Number – Route/System Number - Sequence Number

To find the Agency Number select City or County and [Run Report on this Site](#).
