Foreword

The Ports and Waterways Section of the Minnesota Department of Transportation has prepared this barge terminal directory to provide general information about Minnesota's river terminals.

The directory includes information on the 41 terminals on Minnesota's two navigable rivers, the Mississippi and Minnesota. Currently, there are no active terminals on the St. Croix. Terminals are arranged, in the directory, by location on each river, beginning with those at the lowest river mile proceeding to the highest river mile. The index presents an alphabetic listing of the terminals. Information for each terminal includes location, commodities handled, handling equipment, rail-truck access, contact person and where available the total storage capacity of the facility.

Information included in this directory was obtained from terminal operators, fleet owners, port authorities, and municipal officials.

At this printing I have excluded the following river terminals as they currently do not handle any river freight and are considered non-active: Bay State Milling Company in Winona, Red Wing Municipal Terminal #2, Erickson Petroleum in Newport, Barton Enterprises in Red Rock, Xcel Energy Highbridge plant in St. Paul, Xcel Energy Riverside plant in Minneapolis, Xcel Energy plant in Burnsville on the Minnesota River, and the Xcel Energy plant at Bayport on the St. Croix River.

This publication is also available on Mn/DOT's Ports & Waterways Web site:

<http://www.dot.state.mn.us/ofrw/waterways.html>

At the bottom of the page under Waterway Publications select: Minnesota's River Terminals - March 2013
