

## **Meeting #1 - Base Understanding**

This meeting presented the latest guidance related to federal freight performance measures, as well as background on what freight performance measures MnDOT currently tracks. Participants identified what elements of freight performance are most critical to measure from their perspective, and why, e.g., to report performance to stakeholders, identify needs, or help program projects. Gaps between existing state measures, required federal measures, and desired measures were discussed, including adaptation of current non-freight performance measures, leading to an initial direction for future MnDOT freight performance measures.
