Midwest Regional Rail System Phase 5

Summary of Infrastructure Costs

Revision Date: 4/18/03

(All numbers in thousands)

No.	Route	Cost Estimate Phase 5 Year 2002 Dollars	Cost Estimate Phase 3B Year 2002 Dollars
a	Chicago Terminal Area	$ 1,152,115	$ 475,059
b	System Maintenance Facility	$ 45,351	N. A.
c	Chicago Union Station	$ 15,000	N. A.
1	Porter to Detroit / Pontiac	$ 329,771	$ 214,963
2	Battle Creek to Port Huron	$ 67,029	$ 59,700
3	Kalamazoo to Grand Rapids / Holland	$ 27,178	$ 21,942
4	Tolleston to Cleveland	$ 1,087,640	$ 599,559
5	Tolleston to Cincinnati	$ 507,468	$ 386,489
6	Grand Crossing to Carbondale	$ 219,878	$ 265,864
7	Joliet to St. Louis	$ 243,256	$ 195,138
8	St. Louis to Kansas City	$ 314,318	$ 295,937
9	Aurora to Quincy	$ 257,362	$ 219,641
10	Wyanet to Omaha	$ 360,207	$ 225,767
11	Rondout to St. Paul	$ 1,049,791	$ 733,191
12	Milwaukee to Green Bay	$ 311,717	$ 35,864
TOTAL		**$ 5,988,079**	**$ 3,729,114**

Notes:

This MWRRI Phase 5 Cost Estimate represents an update of the original Phase 3B Estimate prepared in 1997.

Data for track lengths, alignment, and location of bridges and grade crossings was taken from Trackfiles prepared by TEMS.

Input regarding Maintenance Facility, Service and Inspection Facility and Layover Facility locations and costs were provided by Amtrak.

HNTB

TABLE B

MWRRI PHASE 5

CHICAGO TERMINAL AREA LIMITS

Revision Date: 3/30/03

Segment			Lump Sum Cost (in Thousands)
South of the Lake Corridor:			
Chicago to Buffington Harbor	$ 265,000		
Buffingon Harbor to Tolleston	$ 64,000		
Buffington Harbor to Porter	$ 315,000		
Total South of the Lake Corridor			$ 644,000
Grand Crossing Improvements			$ 12,000
Chicago to Joliet			
Joliet Interlocking and Tunnel / Station		$20,000	
Corwith to Argo		$ 901	
Argo to Lemont		$ 8,533	
Lemont to Joliet		$ 3,381	
Metra Heritage Corridor Grade Separation		$168,300	
Total Chicago to Joliet			$ 201,115
Chicago to Aurora			$ 20,000
Chicago to Rondout (from 1995 Chicago to Milwaukee Study)			$ 275,000
TOTAL			$ 1,152,115

The Chicago end of the Detroit, Cleveland, Cincinnati and Carbondale routes are under further detailed study as a part of the South-of-the-Lake corridor study by Amtrak, MDOT and INDOT. From Chicago Union Station (CUS) to Englewood and Grand Crossing, these four routes will continue to share the corridor along the NS right-of-way. From Englewood to Grand Crossing, construction of new double track is proposed. The South-of-the-Lake Corridor infrastructure cost estimate from CUS to Grand Crossing is about $161.5 million.

An additional $12 million placeholder is included in the MWRRS cost estimates for a new track connection at Grand Crossing to the CN/IC tracks toward Carbondale.

The St. Louis route will continue share Metra's route from CUS to Joliet. The proposed passenger service will co-mingle with Metra and the host freight carrier trains at maximum speeds of 79 mph through this segment. Amtrak has proposed that the passenger platforms at the Joliet station be reconfigured to improve freight and passenger train movements through the interlocking. A $20 million placeholder cost is included in the estimates to cover a new interlocking, platforms and tunnels at the Metra/Amtrak Station in Joliet. Additonally, a placeholder of $168 million has been included for the Metra Heritage Corridor grade separation program.
Capital cost estimates for the St Louis to Kansas City route and the Cleveland to Toledo segment are subject to change
The Quincy route will continue to share Metra's route from CUS to Aurora. The proposed passenger service will co-mingle with Metra and the host freight carrier trains at maximum speeds of 79 mph through this segment. A $20 million placeholder cost is included in the estimates for track and signal improvements, including new interlockings and crossovers.

For the Chicago to Rondout segment, cost estimates from the 1995 Tri-State study were used for the MWRRS estimate. Since 1995, Metra traffic volume has increased and new Metra stations have been added along this segment. To account for these developments, the 1995 costs were inflated to 2002 dollars and further increased by 50%.

Chicago to Milwaukee Costs from 1995 Chicago to Milwaukee Study	
Total Cost (in 1993 Dollars, includes 7% Engineering and 15% Contingencies)	143,793,074
Inflate to 2002 costs	183,235,514
Add 50%	91,617,757
TOTAL	274,853,271

NOTES

Installation of PTC system does not include locomotive equipment and dispatch equipme
Cost Estimate does not include utility relocation.
Corridor access with frieght railroads to be negotiated; costs not included
Station costs are MWRRS allocation amounts
Siding improvements incorporate recommendations from TEMS Ideal Day Analysis Report (Dated March 8, 2002)
Close 25% of all private crossings where speeds are above 79 mph; remainder are Conventional Gate
Four Quandrant Gates all public crossings at speeds > 79mph
Conventional Gates all public crossings at speeds </= 79mph
Michigan Type Grade Crossing surface used at all crossings
Precast Panels with Rdway Improvements installed where track embankment is replaced
Precast Panels without Rdway Improvements installed where track embankment is not replaced
Assume 26' offset for new mainline track construction for speeds above 79 mph

ASSUMED STATION LOCATIONS AND IMPROVEMENTS:

MP 228	Michigan Cit	Full Service - Renovated
MP 192	Niles	Full Service - Renovated
MP 179.5	Dowagiac	Full Service - Renovated
MP 143.5	Kalamazoo	Full Service - Renovated
MP 120.8	Battle Creek	Full Service - Renovated
MP 95.9	Albion	Full Service - Renovated
MP 75	Jackson	Full Service - Renovated
MP 38	Ann Arbor	Full Service - Renovated
MP 8	Dearborn	Full Service - Renovated
MP 5.6	DETROIT	Full Service - Renovated
MP 13.2	Royal Oak	Full Service - Renovated
MP 17.5	Birmingham	Full Service - Renovated
MP 25.8	Pontiac	Terminal - Renovated

NOTES

- Cost Estimate does not include utility relocation.
- Corridor access with frieght railroads to be negotiated; costs not included
- Station costs are MWRRS allocation amounts
- Siding improvements incorporate recommendations from TEMS Ideal Day Analysis Report (Dated March 8, 2002)
- Close 25% of all private crossings where speeds are above 79 mph; remainder are Conventional Gate
- Four Quandrant Gates all public crossings at speeds > 79mph
- Conventional Gates all public crossings at speeds </= 79mph
- Michigan Type Grade Crossing surface used at all crossings
- Precast Panels with Rdway Improvements installed where track embankment is replaced
- Precast Panels without Rdway Improvements installed where track embankment is not replaced

ASSUMED STATION LOCATIONS AND IMPROVEMENTS:

MP 176.6	Battle Creek	* Included in Detroit route
MP 223.9	East Lansing	Full Service - Renovated
MP 253.3	Durand	Full Service - Renovated
MP 280	Flint	Full Service - Renovated
MP 290	Lapeer	Full Service - Renovated
MP 334.2	Port Huron	Terminal - Renovated

NOTES

- Cleveland buildout includes capacity for proposed commuter service
- It is assumed that the embankment fits within NS right-of-way
- Assume 26' offset for new mainline track construction for speeds above 79 mph
- Installation of PTC system does not include locomotive equipment and dispatch equipment.
- Corridor access with frieght railroads to be negotiated; costs not included
- Station costs are MWRRS allocation amounts
- Siding improvements incorporate recommendations from TEMS Ideal Day Analysis Report (Dated March 8, 2002)
- Close 25% of all private crossings where speeds are above 79 mph; remainder are Conventional Gate
- Four Quandrant Gates all public crossings at speeds > 79mph
- Conventional Gates all public crossings at speeds </= 79mph
- Precast Panels with Rdway Improvements installed where track embankment is replaced
- Precast Panels without Rdway Improvements installed where track embankment is not replaced

ASSUMED STATION LOCATIONS

NOTES

- Installation of PTC system does not include locomotive equipment and dispatch equipment.
- Cost Estimate does not include utility relocation.
- Corridor access with frieght railroads to be negotiated; costs not included
- Station costs are MWRRS allocation amounts
- Siding improvements incorporate recommendations from TEMS Ideal Day Analysis Report (Dated March 8, 2002)
- Assume 75% of underbridges need to be upgraded where speeds are above 79 mph
- Estimate average span of underbridge is 40 feet.
- Close 25% of all private crossings where speeds are above 79 mph; remainder are Conventional Gate
- Four Quandrant Gates all public crossings at speeds > 79mph
- Conventional Gates all public crossings at speeds </= 79mph
- Precast Panels with Rdway Improvements installed where track embankment is replaced
- Precast Panels without Rdway Improvements installed where track embankment is not replaced

ASSUMED STATION LOCATIONS AND IMPROVEMENTS:

NOTES

- Installation of PTC system does not include locomotive equipment and dispatch equipment.
- Cost Estimate does not include utility relocation.
- Corridor access with frieght railroads to be negotiated; costs not included
- Station costs are MWRRS allocation amounts
- Siding improvements incorporate recommendations from TEMS Ideal Day Analysis Report (Dated March 8, 2002)
- Assume 75% of underbridges need to be upgraded where speeds are above 79 mph
- Estimate average span of underbridge is 40 feet.
- Close 25% of all private crossings where speeds are above 79 mph; remainder are Conventional Gate
- Four Quandrant Gates all public crossings at speeds > 79mph
- Conventional Gates all public and private crossings at speeds </= 79mph
- Precast Panels with Rdway Improvements installed where track embankment is replaced
- Precast Panels without Rdway Improvements installed where track embankment is not replaced

NOTES

- Installation of PTC system does not include locomotive equipment and dispatch equipment.
- Cost Estimate does not include utility relocation.
- Corridor access with frieght railroads to be negotiated; costs not included
- Station costs are MWRRS allocation amounts
- Close 25% of all private crossings where speeds are above 79 mph; remainder are Conventional Gate
- Four Quandrant Gates all public crossings at speeds > 79mph
- Conventional Gates all public and private crossings at speeds </= 79mph
- Precast Panels with Rdway Improvements installed where track embankment is replaced
- Precast Panels without Rdway Improvements installed where track embankment is not replaced

NOTES

Installation of PTC system does not include locomotive equipment and dispatch equipment.
Cost Estimate does not include utility relocation.
Corridor access with frieght railroads to be negotiated; costs not included
Station costs are MWRRS allocation amounts
Siding improvements incorporate recommendations from TEMS Capacity Analysis Report (Dated September, 2001) for the Milwaukee to Madison Passenger Rail Corridor Study
Close 25% of all private crossings where speeds are above 79 mph; remainder are Conventional Gate
Four Quandrant Gates all public crossings at speeds > 79mph

ASSUMED STATION LOCATIONS AND IMPROVEMENTS:

MP 17.2	Glenview	included in the Chicago to Milwaukee Study Cost Estimates
MP 61.5	Sturtevant	included in the Chicago to Milwaukee Study Cost Estimates
MP 78.5	GMIA	included in the Chicago to Milwaukee Study Cost Estimates
MP 85.93	Milwaukee	Full Service - Renovated
MP 100.00	Brookfield	Full Service - Renovated
MP 117.5	Oconomowoc	Full Service - Renovated
MP 131.2	Watertown	Full Service - Renovated
