

# Project Management Vision

To achieve the Strategic Vision, MnDOT project management utilizes professional, expert people, effective processes, and appropriate support tools to deliver high quality projects that provide business value on scope, on time and on budget.

What it means to have:

## Professional, Expert People

- Project Managers:
  - Committed to delivery on scope, on time, and on budget with a high degree of quality in the final product and customer satisfaction
  - Understand and apply project management processes
  - Excellent communicators and leaders
  - Retained through development of a career path
- Effective project teams
- Management that gives authority over to project teams
- Management that holds project teams accountable for delivery
- Defined project related roles and responsibilities

## Effective Processes

- Scalable:
  - Scoping
  - Scheduling
  - Cost Estimating
  - Risk Management
  - Monitoring
  - Change Management
- Reporting & Accountability
- Issue Escalation
- Portfolio & program management
- Lessons Learned & Continuous Improvement

## Appropriate Support Tools

- Scalable templates
- Resource loaded schedules
- Project and Program Information System
- Collaboration tools
