Re: Provisional Approval for Evaluation of 1110 Series High Build Waterborne Paint for High Build Latex Paint Category

Dear Ms. Bruce:

This letter grants provisional approval for the use of 1110 Series High Build Paint on projects administered by the Minnesota Department of Transportation. This approval is on a limited basis for application on construction contracts for the purpose of evaluating the performance of this product on Minnesota highways, and for inclusion on MnDOT's Approved/Qualified Products List for pavement markings in the High Build Latex Paint category. **This provisional approval is valid until December 31, 2016** and is limited to a total of 3 state projects.

The conditions for application on state projects are:

1. All requirements of the Pavement Marking Qualification and Acceptance Program, found at: <http://www.dot.state.mn.us/products/pavementmarkings/pdf/pavementmarkingapproval.pdf> are satisfied.
2. Any lot verification samples of the product must be sent to the MnDOT Materials lab at:  
Allen Gallistel, Office of Materials and Road Research  
1400 Gervais Ave.  
Maplewood, MN 55109  
Phone 651-366-5548
3. Project Engineer approves of the substitution of material on each project.
4. The material will be applied as detailed in the specifications and special provisions for each project with no additional cost to MnDOT.
5. The vendor and/or contractor will notify the Pavement Marking Engineer of the installation date at least 5 days prior to installation. After installation the vendor and/or contractor will complete the Contractor Stripper Operations Daily Report Form and submit this information within 5 working days of installation to Pavement Marking Engineer, at fax 651-234-7370. **This information is critical in tracking the performance of the product for evaluation.**
6. The manufacturer and contractor will be responsible for all performance requirements of the pavement marking specifications included in each project contract.

Upon completion of the projects and review of the installations, this product will either be placed on the qualified products list, issued an extension for limited approval, or removed from consideration for use in Minnesota. Please contact me via phone at 651-234-7380, or e-mail at [michelle.moser@state.mn.us](mailto:michelle.moser@state.mn.us) with any questions or concerns.

Sincerely,

Michelle Moser, PE  
Pavement Marking and Traffic Device Engineer  
Minnesota Department of Transportation
