

Delegated Contract Process (DCP) for Local Agency Federal Aid Projects

Always check the [State Aid website](#) for current forms and procedures. Refer to the [State Aid Manual Construction Chapter](#) (PDF) for more information on construction procedures for Federal Aid Projects.

READ THE FOLLOWING BEFORE YOU START

Approval is required first

Prior approval must be received before expenses are incurred, or they will not be reimbursed.

This is not a grant program

Federal funds are released after the expense is incurred. Sponsoring agencies must be financially able to make the contract payments.

This list contains typical federal and state aid requirements

The sponsoring agency is responsible to see that projects are developed and constructed in accordance with all applicable federal/state/local laws, whether they're on this checklist or not.

This list covers plan development and contracting process only

For information on the environmental review process, refer to the [State Aid Manual Environmental and Design Studies Chapter](#) (PDF).

This checklist is not all inclusive

Refer to the State Aid Manual for complete information.

Send in all required forms

The forms linked in this document contain information needed to comply with federal regulations. Do not alter the forms. Failure to provide all the information could jeopardize your federal funds. Shortcut links to all the forms are located at the end. **Forms shall be sent electronically unless otherwise directed.**

Federal requirements will apply to all work included in the construction contract

Other projects included in a federal contract must follow applicable federal requirements.

Call if you have any questions

Contact your [District State Aid Engineer](#) or the [SALT Division](#) if you have any questions on your federal aid project. Contact [State Aid Finance](#) for questions related to payments.

Project Sponsor

In order to be a recipient of a federal aid project, the recipient must either be a public agency, or the project must be sponsored by a public agency on behalf of the recipient.

The project recipient/sponsor must be qualified to administer a federal aid construction contract. To be qualified, the local public agency must be adequately staffed & suitably equipped to undertake & satisfactorily complete the work. Projects must receive adequate supervision & inspection to insure that projects are completed in conformance with approved plans & specifications.

The District State Aid Engineer will determine if a project sponsor is qualified. Qualification is determined on a **project-by-project basis**.

If a project sponsor cannot qualify on their own, but elects to use consultants for engineering services, the local public agency shall provide a full-time employee of the agency, qualified to be in responsible charge of the project.
