**Notes**

<sup>1</sup> 2016 - 2020 crash data were compiled on 01/20/2021 for Route Systems CSAH and CR via MnCMAT2.

<sup>2</sup> Mileage and were compiled from [www.dot.state.mn.us/roadway/data/data-products.html#VMT](http://www.dot.state.mn.us/roadway/data/data-products.html#VMT)

<sup>3</sup> Population comes from Department of Administration, StateDemographic Center

<sup>4</sup> Median is the middle of a distribution: half the numbers are above the median and half are below the median.

<sup>6</sup> Standard deviation tells you how tightly the data are clustered around the sample mean.

Measure	Fatal Crashes per 100 MVMT	Crashes per MVMT	Fatal Crashes per 100K Pop	Crashes per 100k Pop
Mean	0.5	1.8	18.0	6,593
Median	0.4	1.6	14.5	6,015
Std Dev	0.4	0.9	14.7	3,552

**Ranges for green, yellow, and red coloring were developed as follows:**

- green = all values at or below median
- yellow = values between the median and the median + 1 standard deviation
- red = all values above the median + 1 standard deviation
