Universal Transverse Mercator (UTM) Zones, Minnesota State Plane Zones, and Minnesota County Coordinate Projections

For more information, see: http://www.dot.state.mn.us/surveying/tooltech/mapproj.html

**UTM PROJECTIONS**

In Minnesota, UTM Zone 15 is usually extended to cover the entire state and is then denoted as Zone 15E.

**STATE PLANE PROJECTIONS**

The three zones are Lambert Conic Conformal Projections.

Zone boundaries are coincident with specific county boundaries.

**COUNTY PROJECTIONS**

- Lambert Conic Conformal
- Transverse Mercator
- Oblique Mercator

Notes: Lighter-weight county lines indicate identical projections in adjacent counties.

Dashed lines indicate county zone boundaries.
