SURVEY & LAND MANAGEMENT

MNDOT TRANSPORTATION DISTRICTS

THERE IS AN EFFORT TO MODERNIZE LAND RECORDS ACROSS MINNESOTA, PARTICULARLY TO CREATE PARCEL MAPS THAT COVER THE STATE. MN/DOT IS JUST ONE OF THOSE INVOLVED. DATA ABOUT PARCEL OWNERSHIP IS REQUIRED FOR TRANSPORTATION RIGHT-OF-WAY ACQUISITION AND OTHER STATE LAND MANAGEMENT PURPOSES. THESE DAYS, NUMEROUS GROUPS AND AGENCIES IN MINNESOTA ARE CREATING DIGITAL LAND DATABASES.

THE MINNESOTA DEPARTMENT OF TRANSPORTATION PROVIDES THE FOLLOWING PRODUCTS, SERVICES AND CONTACTS TO HELP FOSTER THE EXCHANGE OF DIGITAL (GRAPHICAL) PARCEL INFORMATION.

PARCEL RELATED INFORMATION AVAILABLE:

- **GEODETIC SURVEY CONTROL**
A database of statewide information on permanent geodetic control marks of horizontal and vertical positions for use in surveying, mapping and GIS/LIS activities.
- **FIELD SURVEY DATA**
Mn/DOT's District Survey Offices maintain field survey data on boundary, centerline, and right-of-way location and associated monumentation activities.
- **RIGHT-OF-WAY PLATS**
Recorded documents depicting proposed right-of-way acquisition that delineate boundaries, monumentation and related right-of-way parcel data.

- **FINAL RIGHT-OF-WAY MAPS**
Maps that graphically display information pertaining to the final boundary and right-of-way extents following completion of a road project.
- **PARCEL FILE DATA**
A collection of important documents relating to and supporting acquisition of the parcel. Certificate of surveys, appraisal data, attorney's certificate of title, instruments of conveyance, well information, photographs, parcel sketch, and field title reports are just a few of the potential items found in these files.
- **STATE OF MINNESOTA BASEMAP**
A map derived from the digitized "skeletal quad" files (1:24000 scale) and frequently used for GIS planning purposes.
- **CORPORATE BOUNDARY MAPS**
Maps that show detailed municipal corporate boundary information. Current state, county and municipal street maps; metropolitan area maps; and other low resolution base mapping that may be required for use in GIS/LIS, GPS and planning and programming activities are also available.

THESE MAPS AND RELATED DOCUMENTS ARE IN A VARIETY OF FORMATS, RANGING FROM PAPER TO SCANNED IMAGES TO CAD FILES TO GIS DATASETS. ALL ARE AVAILABLE TO POTENTIALLY ASSIST IN YOUR EFFORT TO MODERNIZE YOUR LAND RECORD SYSTEM.
