#### *Presentation overview*

The Pedestrian, Bicycle, and Transit Planning Unit in the Office of Transit and Active Transportation is busy group of people. Learn more about current projects they're working on and how it impacts Minnesota's transportation system. Projects include:

- Safe Routes to School
- Counting people walking and bicycle
- Pedestrian and bicycle safety education
- Transit system planning
- District bicycle plans

*Presenter*

Amber Dallman tries really hard to keep up and support a smart and quick-witted team of pedestrian, bicycle & transit practitioners. They develop and implement plans, programs and projects statewide for better walking, bicycling and transit. She is a public health nerd working at MnDOT in the Office of Transit and Active Transportation. In her spare time, she tries to walk fast enough to keep up with her 2 bicycling kiddos on the way to find food and places to play.
