....

Presenter: Howard Preston

Howard began his career working with MnDOT, where he helped develop MnDOT's HSIP. Following his experience working at MnDOT, Howard has worked for private engineering companies, where he has gained decades of experience serving as the project manager on a multitude of safety projects. He has experience managing teams of transportation engineers, designers, and planners. The focus of Howard's career is highway traffic safety, as he has published research reports documenting the effects on safety associated with access management, street light installation, alternative left-turn lane designs, dynamic signage at curves, and advanced EMS technologies.

He has extensive experience helping local agencies in Minnesota, including authoring local safety plans statewide, Traffic Safety Fundamentals Handbook, pedestrian/bicycle safety handbook, sign maintenance handbook and Road Safety Audit's. Howard was the Principal Investigator for the development of the FHWA's *Systemic Safety Project Selection Tool*. In addition, he has experience working on SHSPs for Iowa, Mississippi, Nebraska, North Dakota, South Dakota, and Nevada."

Presentation Overview

The presentation will provide an introduction to the Minnesota Manual on Uniform Traffic Control Devices. The complete manual can be viewed at:
