## **Presenter: Melissa Barnes, PE, PTOE**

Melissa Barnes has ten years of experience and is the statewide Pedestrian and Bicycle Safety Engineer where she works on policies, guidelines and specific issues relating to a variety of aspects of pedestrian and bicycle safety and design. She began at MnDOT in 2012. Prior to MnDOT she worked as a professional engineer and consultant in traffic engineering and has a personal passion for bicycle and pedestrian issues.

### ***Presentation Overview***

The presentation will provide an overview of common pedestrian and bicycle crash types as well as countermeasures to prevent them. Pedestrian and bicycle crashes can be particularly frustrating because of their random nature and the vulnerability of cyclists and pedestrians. Simple and complex pedestrian crash countermeasures will be presented along with pros and cons and situations for appropriate use.
