

MnRoad closed loop test track

November 30, 2005
5800' Straightaway

- PCMS
- ▬ Tube delineators spaced at 50ft.

Angularity Test

Displays centered on edgelines. For angularity observations driver aligned his position in vehicle with the opposite edgeline, a lateral distance of 24' from the center of display, and proceeded toward PCMS until message became illegible.
