RE: Highway Construction Cost Index – 3rd Quarter 2016

The Minnesota Highway Construction Composite Cost Index was not computed for the 3rd Quarter 2016, due to the absence of data for the Excavation, Structural Steel, Structural Concrete and Concrete Pavement indicator items. Without a unit price for each indicator item, the resulting index is not comparable to previous indices.

- The average Reinforcing Steel cost was \$1.35/CY with no data for comparison in the 3rd Quarter of 2015. One (1) project was considered this quarter.
- The average Plant Mixed Bituminous cost was \$42.77/ton, down \$11.69/ton from the 3rd Quarter of 2015. Four (4) projects were considered this quarter. The price reduction is a result of a significant decrease in the price of the oil used in the Bituminous Mixture that began during the 3rd and 4th Quarters of 2015. *Poten & Partners* reports a 30.2% drop in the average price of this commodity between the 3rd Quarter of 2015 and the 3rd Quarter of 2016. The low point for oil pricing occurred in the 1st Quarter of 2016 and prices have begun to rise.

Other factors that contributed to lower construction costs in the 3rd Quarter of 2016 as compared with the 3rd Quarter of 2015, include lower fuel prices and increased competition for our work.

The *OPIS Energy Group* tabulation titled "*RackFax, Minneapolis, MN, OPIS Direct Gross No. 2 Distillate Fuel*" indicates an 11.9% drop in the average price of fuel between these two quarters. The low point for fuel pricing also occurred in the 1st Quarter of 2016 and prices have begun to rise.

The average number of bidders per project was 2.5 for 3rd Quarter of 2015. In comparison, the average number of bidders in the 3rd Quarter of 2016 was 3.89.

3rd Quarter 2016 project information is compared to 3rd Quarter 2015 below.

Minnesota Construction Cost Index

The Minnesota Construction Cost Index is an indicator of price trends for highway construction.

It is composed of six indicator items: roadway excavation, to indicate the price trends for all roadway excavation; concrete pavement and plant-mixed bituminous, to indicate the price trend for all surfacing types; and reinforcing steel, structural steel, and structural concrete, to indicate the price trend for structures.

Each quarter, an average unit price is computed for each indicator item. The unit price is based upon the actual bids from projects **excluding Design Build projects**, costing more than \$100,000, and let during that quarter. These unit prices include the cost of material, labor, equipment, overhead and profit.

These unit prices along with the 1987 base unit prices and quantities are used to compute the Excavation, Surfacing, Structures and Composite Index.

NOTE: In 2007, the FHWA stopped collecting Price Trend data,
and no longer provide the reports necessary to complete the comparison graphs.
