B830
Concrete Barrier or Parapet (Slipform Alternate)

Approved and signed, August 24, 2016.

**Approved 08-24-2016**

GENERAL:
- Changed the title of the sheet from "Concrete Railing (Type F) (Slipform Alternate)" to "Concrete Barrier or Parapet (Slipform Alternate)". B830 now includes Type F, Type S, and Parapet details.
- Archived B831 "Concrete Parapet Railing (Slipform Alternate)" since the parapet details were merged onto this detail.

This is a brand new detail that combines the old B830 & B831 requirements and adds Type S barriers. The detail has been completely updated and revised to match current construction practices.

**Revised 04-17-2013**

This B-detail was updated to convert reinforcing bar marks from metric to U.S. customary bar designations.

**Approved, and signed, November 22, 2002.**
