

How to Read a SAFETYNET Inspection Report

What is this report about?

MN DOT is required by law to inspect Special Transportation Service (STS) vehicles. The information from the inspection is uploaded into a *federal* database called SAFETYNET. The “Inspection Carrier Profile Report” summarizes the SAFETYNET inspection data and violations for each vehicle that was inspected.

What information is on the report?

Date and time of the report

Name of person who prepared the report

Vehicle Identification – One or more of three possible numbers will be used:

1. US DOT number, if the carrier has one
2. MN DOT number, also known as the STS number
3. MC/MX number, issued by federal authorities if the carrier holds interstate operating authority

Carrier Type – One of two possibilities will be noted:

1. Intrastate (within Minnesota)
2. Interstate (crossing state lines)

Inspection Data - Totals and averages are summarized in four categories:

- 1st row = Total number of inspections summarized on the report.
- 2nd row = Number of inspections with violations. (This is the most applicable row for STS vehicles.)
- 3rd row = Number of inspections with Hazard Material (HM) violations. (Extremely rare for STS vehicles.)
- 4th row = Number of inspections with Out of Service (OOS) violations. (Applicable; however, not common.)

Violation Summary – Total of violation categories for the carrier and the total of inspections with that particular violation category are noted.

Do you have questions or want more detailed information about STS vehicle inspection reports? Submit a written request to mike.mckay@state.mn.us
