

[2202 W Michigan St Autobahn Building Removal Utilities.pdf](#) is a GIS picture of the area with city utilities on it.

The contractor will disconnect the utilities prior to a demolition permit being issued.

Gas - red on the map - the gas service is connected to the gas main on the far side of the street, under the sidewalk on the north side. The contractor would dig and expose the connection of the main and service, and city will disconnect.

Water - blue on the map - The contractor would dig and expose the connection to the service and the main and again, city will disconnect. The main is located approximately 7.5' south of the center of the road.

Sewer - green on the map - service is connect to sewer main running down the middle of Michigan St. Contractor will dig and cap the service at the main. City will witness the cap. Wye location is 6' east of the manhole out front. Sewer is 12.75' deep.

Any questions on this information, feel free to give me a call to discuss.
