District 3A ITS Scoping Study

FINAL REPORT

March 2004

Prepared by
Edwards & Kelcey
# FINAL REPORT

## TABLE OF CONTENTS

### EXECUTIVE SUMMARY

I. **PROJECT OUTREACH**
   - Stakeholders
   - Outreach Methods
     1. Stakeholder Workshop
     2. Stakeholder Questionnaire
     3. Telephone Calls
     4. Steering Committee
   - Goals and Objectives

II. **INVENTORY**
   - Traffic Safety and Crash Data
   - Current and Planned ITS Deployments
     1. Existing Closed Circuit Television (CCTV) Camera, Dynamic Message Sign (DMS) and Road/Weather Information System (RWIS) Locations
     2. Transportation Operations and Communications Centers (TOCC)
     3. I-94 / TH 10 Mega Corridor Transportation Security Model Deployment
     4. TH 10 Corridor Traffic Advisory System and MnCARS
   - Communications Systems
   - Traffic Signals and Signal Systems
   - Railroad Grade Crossings
   - Public Transit

III. **PROBLEM AND NEEDS IDENTIFICATION**
   - Overview
   - Survey Results and Needs and Objectives Grouping
   - Mapping of Objectives to User Services
   - Translation of Market Packages

IV. **REGIONAL ITS ARCHITECTURE**
   - Overview
   - National ITS Architecture
     1. Architecture Structure
     2. Logical Architecture
     3. Physical Architecture
     4. User Services
5. Market Packages IV-5
C. Functional Requirements IV-5
D. Concept of Operations IV-5
E. Institutional Agreements IV-10
F. Polaris Minnesota Statewide ITS Architecture IV-10
G. District 3A Regional ITS Architecture IV-10
1. Stakeholder Inventory IV-11
2. Interconnect Diagrams IV-11
3. Architecture Flow Diagrams IV-12
4. “Sausage” Diagram IV-12
H. Standards IV-14
I. Regional ITS Architecture Maintenance IV-14

V. ITS TECHNOLOGY ASSESSMENT V-1
A. Overview V-1
B. Translation to Rural ITS Tools V-1
1. Emergency Services V-1
2. Tourism and Travel Information V-1
3. Traffic Management V-2
4. Crash Prevention and Safety V-2
5. Rural Transit and Mobility V-2
6. Operations and Maintenance V-2
7. Surface Transportation and Weather V-2
C. ITS Technologies V-4
1. Emergency Services V-4
2. Tourism and Travel Information V-5
3. Traffic Management V-6
4. Rural Transit and Mobility V-7
5. Crash Prevention and Safety V-7
6. Operations and Maintenance V-8
7. Surface Transportation and Weather V-8
D. ITS Technology Evaluation Criteria V-8
E. ITS Technology Evaluation Scoring System V-9
F. ITS Technology Evaluation Results and Recommendations V-9
1. Emergency Services V-13
2. Tourism and Travel Information V-13
3. Traffic Management V-13
4. Rural Transit and Mobility V-14
5. Crash Prevention and Safety V-14
6. Operations and Maintenance V-14
7. Surface Transportation and Weather V-14
VI. IMPLEMENTATION PLAN

A. Overview

B. Conceptual Design Approach
   1. Deployment Schedule and Phasing
   2. System Component Descriptions
   3. TOCC Migration Plan
   4. Software
   5. Systems Integration
   6. Cost Estimates

C. Integration/Scalable Opportunities

D. Funding Alternatives
   1. Government-Funded Programs
   2. Public-Private Partnerships

E. Operations and Management Plan
   1. Operations
   2. Maintenance
   3. Personnel Resources
   4. Training
LIST OF FIGURES

- Figure II-1 – Mn/DOT District 3 Boundary Map II-2
- Figure II-2 – Mn/DOT District 3A Boundary Map II-3
- Figure II-3 – District 3A Top Trunk Highway Intersections by Crash Cost II-4
- Figure II-4 – Brainerd Area Top Trunk Highway Intersections by Crash Cost II-5
- Figure II-5 – District 3A Intersections with 15 or More Crashes II-6
- Figure II-6 – Brainerd Area Intersections with 15 or More Crashes II-7
- Figure II-7 – District 3A Cost/Mile II-8
- Figure II-8 – Brainerd Area Cost/Mile II-9
- Figure II-9 – District 3A Number of Crashes/Mile II-10
- Figure II-10 – Brainerd Area Number of Crashes/Mile II-11
- Figure II-11 – District 3A Weather and Road Surface Related Crashes II-12
- Figure II-12 – Bridge Crashes – Weather and Road Surface Related II-13

LIST OF TABLES

| Table II-1 – Mn/DOT District 3A Railroad Grade Crossings by County | II-23 |
| Table II-2 – District 3A Public Transit Service – Provider Summary | II-27 |
| Table III-1 – Stakeholder Survey Responses – General Questions #1 and #2 | III-3 |
| Table III-2 – Mn/DOT District 3A ITS Objectives Mapped to the User Services | III-6 |
| Table III-3 – Relevant ITS Market Packages | III-7 |
| Table IV-1 – National ITS Architecture Subsystems | V-4 |
| Table IV-2 – Relevant ITS Market Packages | V-6 |
| Table IV-3 – Functional Requirements Defined by Equipment Packages | V-7 |
| Table IV-4 – District 3A Regional ITS Architecture Stakeholder List | V-8 |
| Table V-1 – Mapping of District 3A Identified Market Packages to Rural ITS Toolbox Development Tracks | V-3 |
| Table V-2 – ITS Technology Evaluation Criteria and Weight | V-9 |
| Table V-3 – ITS Technology Evaluation Scoring System | V-10 |
| Table V-4 – Cost Evaluation | V-11 |
| Table V-5 – Performance Evaluation | V-12 |
| Table VI-1 – Deployment Schedule | VI-2 |
| Table VI-2 – Mn/DOT District 3A ITS Scoping Study Implementation Plan | VI-13 |
LIST OF APPENDICES

Appendix A – Stakeholders Invited to Workshop No. 1 and Attendees
Appendix B – Stakeholder Workshop Summary Notes
Appendix C – Stakeholder Questionnaire Completion Status
Appendix D – Project Steering Committee Membership
Appendix E – Identified and Ranked Goals / Objectives
Appendix F - List of Railroad Crossings by Type, Location, Daily Trains and AADT
G Appendix IV-A – Interconnect Diagrams
H Appendix IV-B – Architecture Flow Diagrams
I Appendix IV-C – Relevant ITS Standards
