

# Maintenance Research Bulletin: May 2014

**NTREC New Technology Research Equipment Committee  
MOR Maintenance Operations Research**

## RealClean Soap

RealClean is an all-natural, environmentally safe cleaner. RealClean is an excellent hand cleaner but also a general household/industrial use cleaner. In the shop, RealClean will remove dirt, grease and odors such as gasoline, propane, diesel fuel, cutting oils, motor oil and many more, from your hands. In the house, it removes onion, garlic, and fish smell from your hands. District 1 mechanics and maintenance employees will compare this hand cleaner to the current hand cleaner that MNDOT uses for its ability to clean, remove oils and smells and also whether or not it helps condition their hands especially during the winter months when dry skin occurs most often.
