HIGH 'N SLIDE TAILGATE SAVER

The High 'N Slide Tailgate adds versatility, safety and convenience to hauling brush, gravel, etc. Operators can control material metering through the sliding tailgate, or empty large debris with the high lift. The tailgate can add an additional 21" of clearance. It also works as a standard dump-thru application in either position. This product was proposed and awarded to District 6. Operators will evaluate if it improves the process of removing sanders, how convenient and safe it is to haul materials.
