

Maintenance Research Bulletin: September 2016

**NTREC New Technology Research Equipment Committee
MOR Maintenance Operations Research**

Welcome To Mindy

We would like to welcome Mindy Heinkel as our new Maintenance Operations Research Project Manager. She is replacing Ryan Otte who departed in July. Mindy has worked most recently as an Engineering Specialist, Smooth Pavement Coordinator and Transportation Generalist in the Metro District. Mindy also comes to this position with almost a decade of experience owning and operating her own business involved with snow removal for private properties. Although her first day in her new position has not yet occurred, we were able to have her be present at the August NTREC Meeting. Thank you to her supervisors in the Metro District Maintenance Section. Beginning September 7th, Mindy can be reached at 651-366-3585. Please join me in welcoming Mindy to her new position.
